STUDENT OBJECTIVES

Every student who enters upon a University program should set up an educational goal that fits his abilities and interests and has such appeal for him that he will exert the effort and make the sacrifices necessary to complete his program. Freshman interviews show that most entering students plan to graduate, yet one out of three does not complete his college work. Only a small percentage lack the inherent capacity to complete a well-selected college program with realistic goals based on abilities and interests. Most of those who drop out along the way do so because they have no goals which they are determined to reach.

The importance of setting adequate goals for yourself is shown in the following statement:

"Our skill in reaching objectives may depend in no small degree upon the clarity with which we see them. Once our objectives are clearly visible the appropriate steps for reaching them may be initiated—University objectives are concerned with the whole fabric of higher education rather than the achievement of predetermined and often narrow goals in the shortest possible time. . . . It has been suggested that four of the principal goals of professional education are the production of students possessing at graduation: (1) a minimum body of basic and fundamental knowledge which is commonly possessed by members of the profession; (2) skill in handling source materials and in adding to one's body of knowledge; (3) the ability to think, analyze, and act in the presence of new or unprecedented situations; and (4) an ethical attitude toward the uses to which a member of the profession may put his knowledge and skill."

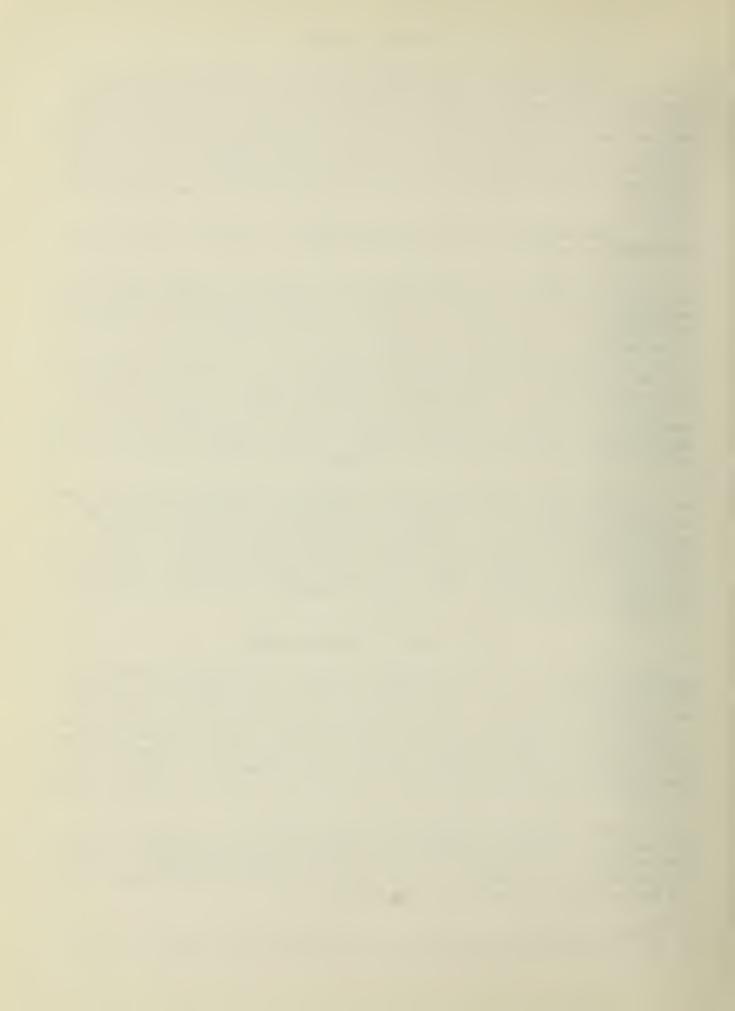

Many students are inadequately motivated because their goals have been too narrowly defined. Hence the basic or fundamental subjects are termed uninteresting and impractical. Selecting courses dealing only with the methods of performing the duties of a particular job, without basing the practical skills on deeply grounded principles, will result in a perishable education. Today's world is characterized by rapid change. Few jobs are done the same way for more than ten years. The more deeply rooted your understanding, the less likely you are to be uprooted by the swift winds of change.

Student Plans and Student Guidance

The fact that many students arrive at the University with undefined educational goals is not a serious handicap, but it can become serious if they do not begin to set up clear-cut goals in line with their capacities and interests soon after they arrive. Each freshman entering the University of Illinois is given a battery of guidance tests to help him enter upon and follow an educational program suited to his abilities. But tests alone are not enough. The goals you set must be individually chosen and must command your interests, loyalties, and devotion to the point where the effort and sacrifice necessary to attain them will be exerted.

The table on the following pages shows the range and pattern of employment normally undertaken by graduates in agriculture. It is an actual record of jobs held in 1960 by graduates. Information about trends in employment and current calls for trained personnel can be obtained from the Associate Dean's Office, 104 Mumford Hall, or from your faculty adviser.

Report of the Special Committee of the National Association of State Universities to Study Postwar Educational Problems -- Mimeograph, 1944.

The University has provided the following five main agencies to give you help and guidance in selecting and planning your individual program:

- 1. The Student Counseling Service, 206 Student Services, administers and interprets tests concerned with the students' abilities, interests, and personality. Professional help with study habits, reading skills, and personal problems is also available.
- 2. The Faculty Adviser, a member of the teaching staff who is chosen by the student or assigned by the Associate Dean's office, helps the student with the ordinary problems of course selection and individual activities. Each faculty adviser serves only as many students as he can know well. If you fail to become acquainted with your adviser, the purpose of the advisory plan is defeated. Your faculty adviser is glad to assist you--make use of him.

It is particularly important for you to seek the counsel of your faculty adviser before and during registration in order that your program may be carefully planned. Occasionally students turn to anyone who will sign a study list. This is likely to result in a short-sighted semester program which will not lead directly toward your objective.

A faculty adviser is assigned to new freshmen without consultation, because the freshmen usually are not acquainted with members of the staff. During the second year, the student is invited to select his own adviser with the help of the staff in the Associate Dean's office. If at any time you wish to change programs or advisers, you should come to the Associate Dean's office.

- 3. The <u>Instructor</u> is a specialist in his field, well acquainted with the subject matter and its related employment opportunities. Do not hestitate to discuss your problems with your instructors. They are here to serve you. They can provide channels through which you may see new opportunities. To locate instructors, use the Staff Directory.
- 4. The <u>Dean</u> and the <u>Associate Dean</u> of the college are responsible for administering student programs and for keeping records. The Associate Dean's office is the principal center for information about college and university regulations, grade requirements, credits to be earned, honors, employment opportunities, and many other facts concerning your educational progress. You should feel free to call on this office with any problem on which you feel you need help.
- 5. The office and personnel headed by the Dean of Students, Dean of Men, Dean of Women, and Director of the Housing Division, all located in the Student Services Building, and the Director of Health Service (Health Center--McKinley Hospital), are ready to serve all students, particularly with relation to personal problems outside the area of formal education.

EXAMPLES OF EMPLOYMENT AND SALARIES JUNE 1965 UNIVERSITY OF ILLINOIS COLLEGE OF AGRICULTURE GRADUATES

This summary includes 113 men and 2 women who completed work for the Bachelor of Science degree in June 1965.

The average annual salary reported was \$6,109. Average starting salaries reported by graduates in previous years are shown below:

1964 - \$5,911	1961 - \$5,200
1963 - \$5,585	1960 - \$4,950
1962 - \$5,245	1959 - \$4,676

Initial Employment or Status	Number	Percent

INCOME AND OCCUPATIONS OF 1960 GRADUATES OF THE UNIVERSITY OF ILLINOIS COLLEGE OF AGRICULTURE FIVE YEARS AFTER GRADUATION

Undergraduate students at the University of Illinois College of Agriculture frequently raise the following questions regarding employment after graduation:

- -- What is the average starting salary for agriculture graduates?
- -- How much can I expect to be earning in five years?
- -- What areas of agricultural employment are expanding most rapidly?
- -- How often do graduates change jobs within the first five years after graduation?

To get answers to these questions, a questionnaire was sent to the 199 men who received the B. S. degree from the University of Illinois College of Agriculture in 1960. One hundred thirty-four alumni returned the completed questionnaire, a response of 67.3 percent.

Some Highlights

In 1965, incomes of the 1960 graduates who responded averaged \$7,828 a year, an increase of 52.8 percent above the reported average starting salary of \$5,122 in 1960. (The average starting salary for June 1965 graduates was \$6,109.)

Agricultural business and industry was the number one job field. Around 50 percent of the 1960 graduates were employed in this area. Nearly 20 percent were in some phase of educational work. Fifteen percent were engaged in farming. Nine percent were professional workers, and 6 percent were doing non-agricultural work.

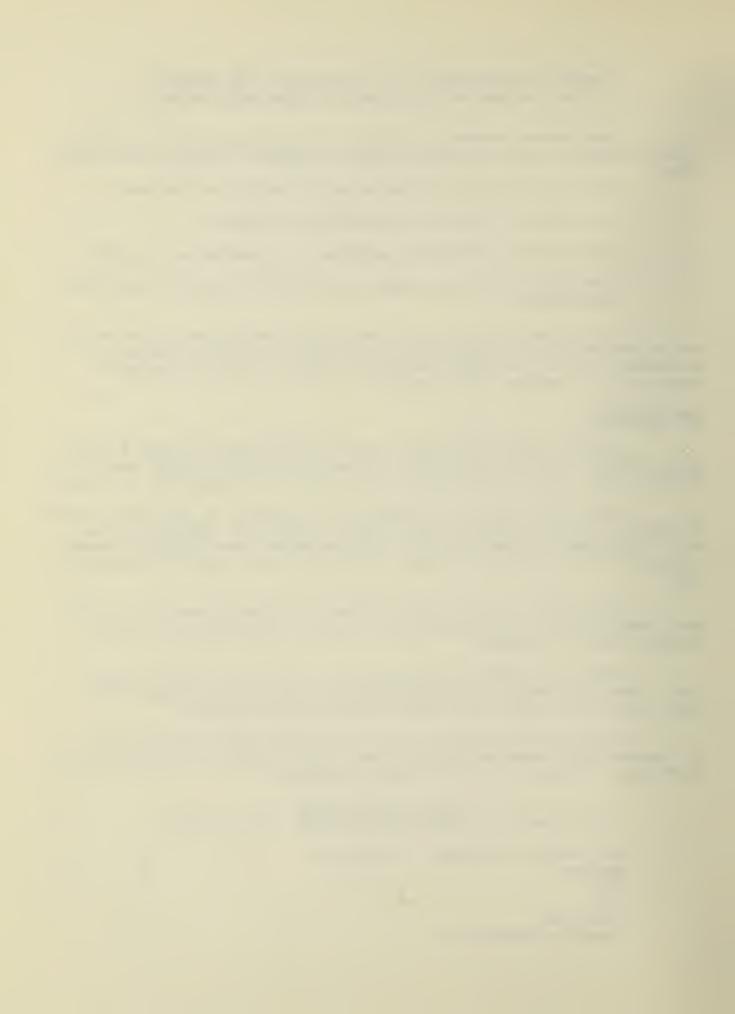

The graduates in agricultural business and industry were the best paid. Their average salary was \$8,004 per year, which was nearly \$200 more than the average for all who responded.

Thirty-six percent of the respondents were working in their original jobs. Twenty-nine percent were working in their second jobs, 10 percent had changed jobs three times, and 5 percent had made four job changes.

During the past five years, four of the 1960 graduates had received Ph.D degrees, while seven were working toward their doctorates. Twenty-seven had earned master's degrees, and two had earned law degrees.

Business and Industry (66 respondents, or 50 percent - average salary, \$8,004)

Farm supplies,	fertilizers	and	chemicals	12
Machinery				7
Seed				5
Feed				7
Publishing				1
Automobile man	ufacturing			1

Insurance	6
Banking and credit	4
Meat industry	3
Dairy industry	3
Steel industry	2
Food industry	6
Grain industry	1
Animal health	2
Advertising	1
Data processing	1
Farm organization	2
Nursery	2

Slightly more than two-thirds of those in business and industry were involved in either sales or management jobs.

Education (26 respondents, or 20 percent - average salary, \$6,807)

Vocational agriculture teachers	10
Extension workers	4
High school science teacher	1
High school guidance counselor	1
High school music teacher	1
College teachers	6
Graduate assistants	3

It should be noted that some of those in educational work had spent from one to three years in graduate work and therefore entered full-time employment somewhat later than others.

Farming (21 respondents, or 15 percent)

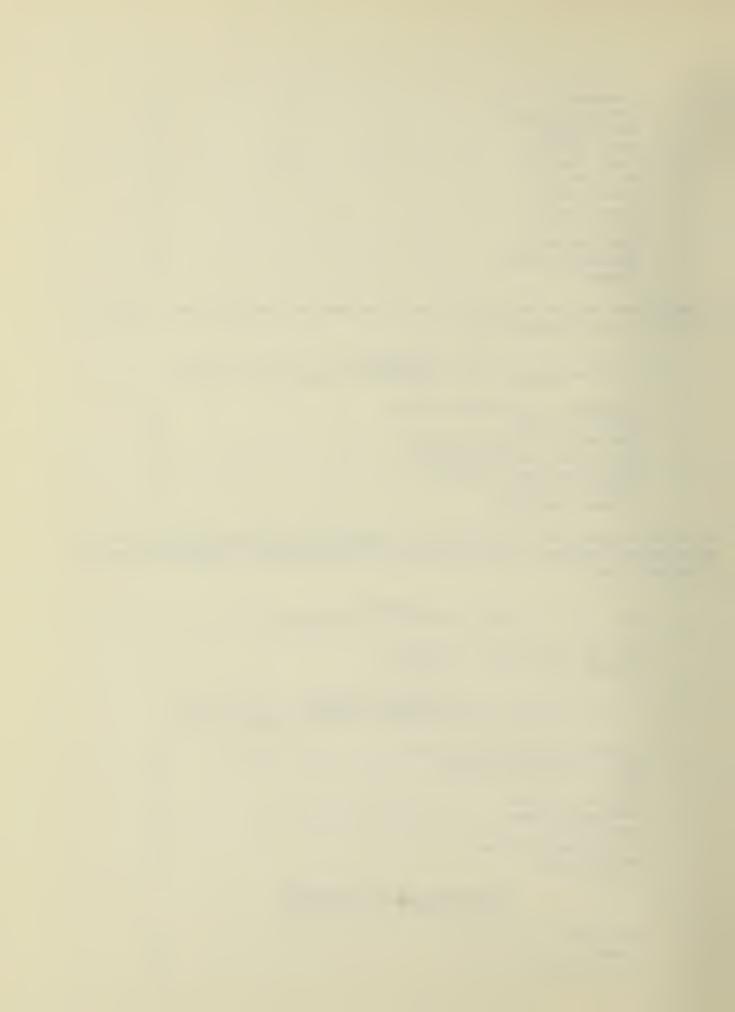

Average size of farm -- 406 acres Average income -- \$7,276

Professional Workers (12 respondents, or 9 percent - average salary, \$7,811)

Farmers Home Administration	1
Soil Conservation Service	3
USDA	2
Federal Land Bank	1
Geological Survey	1
Research work	1
U. S. Forest Service	2
Public Health	1

Non-Agricultural Employment (9 respondents, or 6 percent)

Military	4
Lawyer	2
Miscellaneous	3

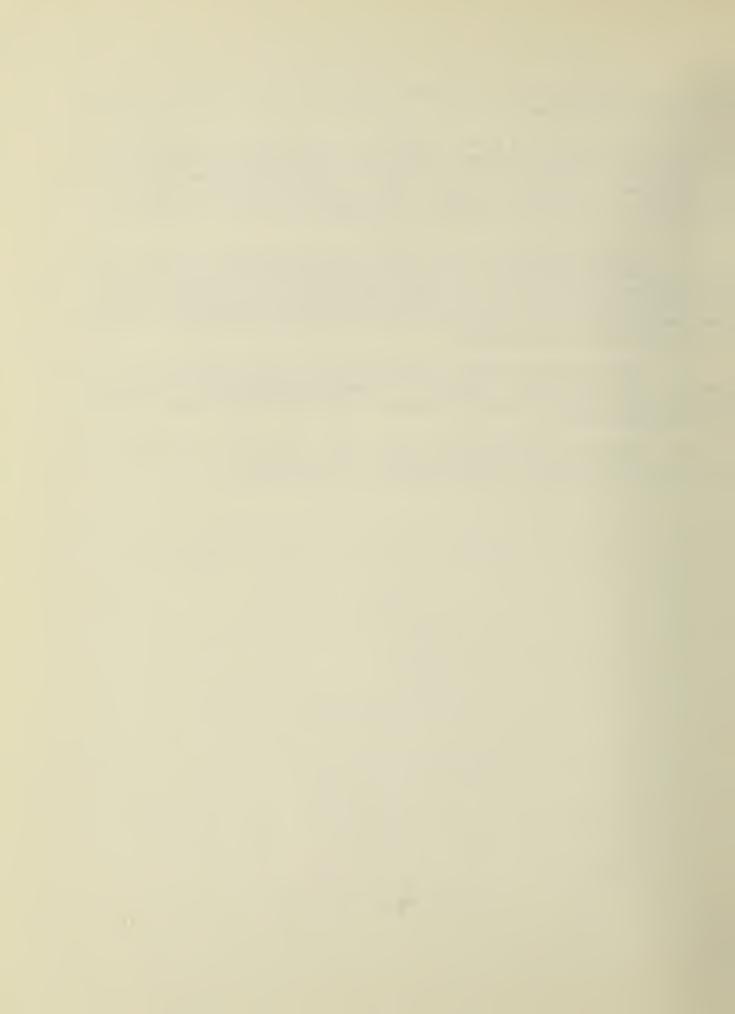

Although no attempt was made to analyze the data, the following general conclusions can be drawn:

The shift toward greater employment in the business and industrial phases of agriculture is evident. Nearly half of all those who replied to the questionnaire were employed in this category. Similar results were reported in a survey made in 1960 of all alumni of the University of Illinois College of Agriculture. At that time 31 percent were employed in business and industry compared with 26 percent in this field in 1950.

Demand for young men in all agricultural areas remains strong. Vocational agriculture teachers and extension workers are always in great demand. The importance of and interest in agricultural production is indicated by the fact that nearly 15 percent of the 1960 graduates were farming in 1965. Government agencies and other employers are constantly requesting graduates to fill professional jobs in agriculture.

Opportunities for young men with interest in agriculture continues to expand. People who are in a position to counsel young people, both rural and urban, should emphasize these opportunities. Agriculture offers many interesting and rewarding careers.

Students who have questions about career opportunities are invited to talk with Assistant Dean Warren K. Wessels, 104 Mumford Hall.

CURRICULA AND MAJORS AS EDUCATIONAL PROGRAMS

The College of Agriculture has, excluding home economics, eleven curricula with various majors or options leading to degrees.

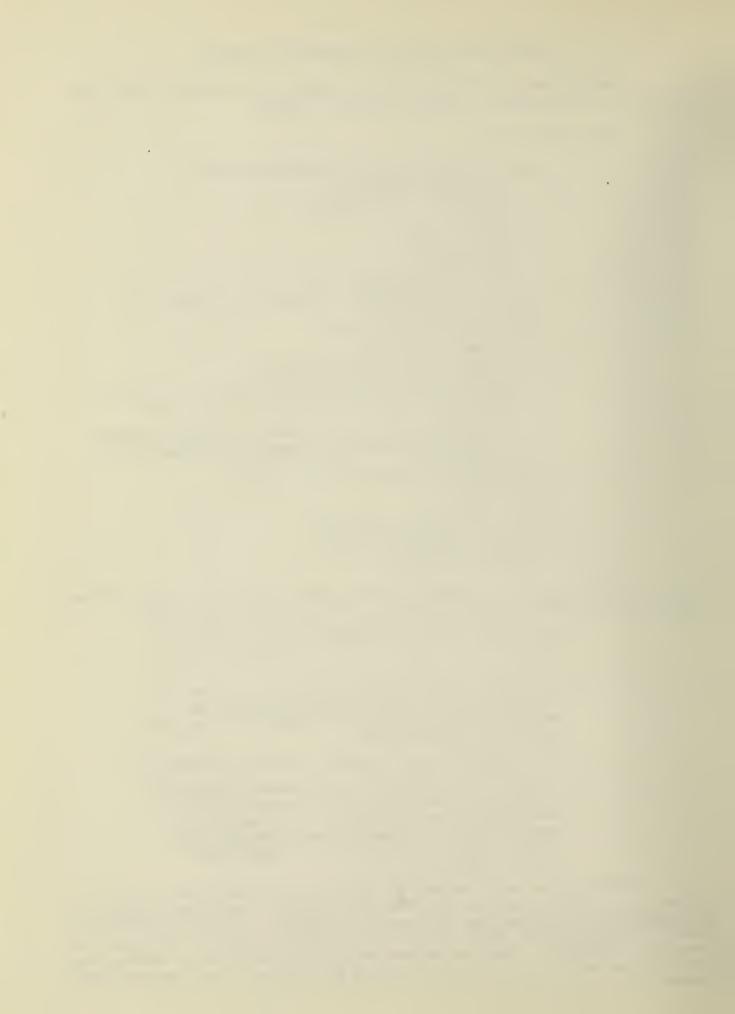

The curricula are:

- 1. Core curriculum in Agriculture with majors in
 - a. Agricultural Economics
 - b. Agricultural Mechanization
 - c. Agronomy
 - d. Animal Science
 - e. Dairy Science
 - f. Horticulture
 - g. General Agriculture
- 2. Curriculum in Agriculture with major for teachers of Vocational Agriculture
- 3. Agricultural Communications
- 4. Agricultural Industries
- 5. Agricultural Science with options in:
 - a. Animal, plant, or soil science
 - Agricultural economics, rural sociology, or agricultural law
 - c. Agricultural engineering--five-year combined program in Agricultural Science and Agricultural Engineering
- 6. Dairy Technology
- 7. Floriculture and Ornamental Horticulture
- 8. Food Science
- 9. Forest Production
- 10. Wood Technology and Utilization
- 11. Preveterinary Medical Program
- 12. Restaurant Management

Curricula are educational programs carefully planned to guide students whose educational goals are within certain related areas. They contain:

- The basic skills or foundation courses required of all students, such as rhetoric and physical education.
- 2. A minimum content of general education, in the biological, physical, and social sciences, and the humanities, widely held to be essential in any program of college education.
- 3. The additional basic sciences, including mathematics.
- 4. Applied courses leading to professional attainments sufficient to permit entrance to some field of professional work or more advanced training on the graduate level. Students planning graduate study should consider the curriculum in agricultural science (pages 57-63).

The following pages present the agricultural curricula and majors in outline form suitable to use as guides or check sheets. Each student should use the appropriate curriculum page to record his progress. As each course is completed, the grade can be inserted, and it will then be possible to determine the remaining requirements. When the student reaches the junior level, the Associate Dean's office sends him a check sheet showing the work yet to be completed before graduation.

The core curriculum in agriculture includes a common core program for the first two years. For the junior and senior years, the student may select one of the approved departmental majors, or the vocational agriculture major; or he may continue with a broad general program by selecting the general major. This curriculum is broad and flexible, with sufficient electives and majors to meet the specific needs of different students.

The <u>curriculum in agricultural industries</u> is designed to prepare students for careers in those industries and businesses that service or are related to agriculture. It provides a broad selection of courses in agricultural sciences, natural sciences, economics and other social sciences, business administration, finance, communication, and the humanities. Because of the similarity of courses during the first two years, students may readily transfer from the core curriculum to the agricultural industries curriculum at any time during the first two years.

The <u>curriculum in agricultural science</u> is suited to those students desiring a stronger foundation in science, mathematics, or engineering, and it is especially recommended for all students expecting to do graduate study or enter upon advanced technical work in an agricultural industry. A student selecting the curriculum in agricultural science should ask for assignment to a faculty adviser in his field of special interest. Ordinarily this should be done by the beginning of the sophomore year.

The preventerinary medical program is designed to prepare students for admission to the College of Veterinary Medicine. Students entering from high school must rank in the upper half of their graduating class. They must maintain at least a 3.5 average to remain in the program and be admitted to the College of Veterinary Medicine.

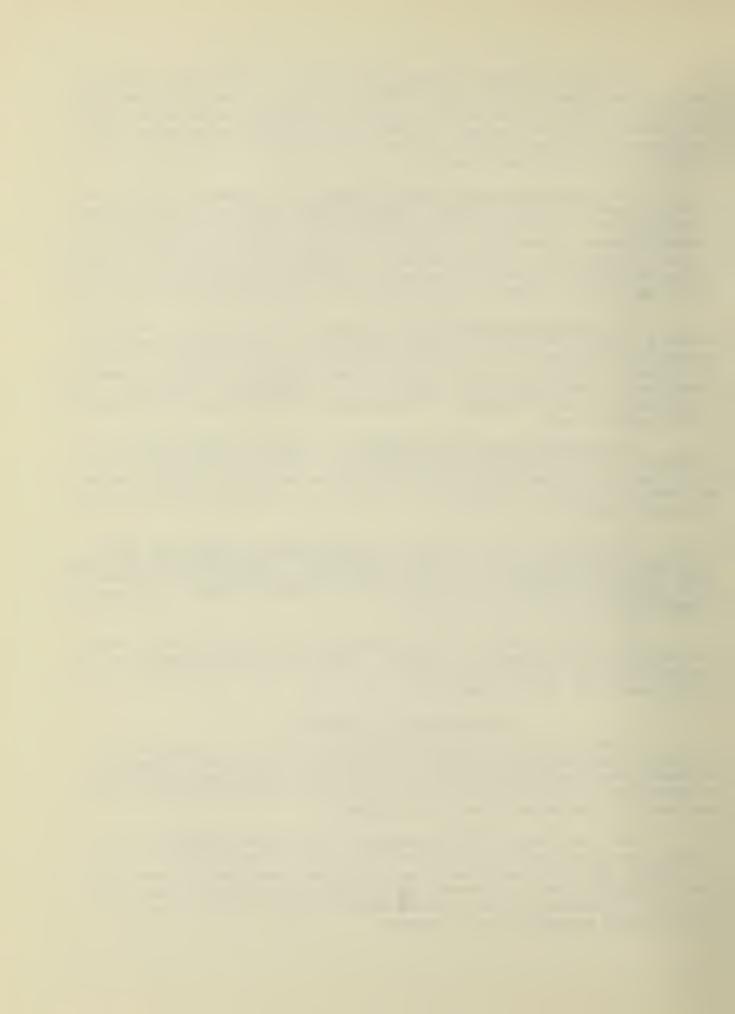

The purposes of the curricula in agricultural communications, dairy technology, floriculture and ornamental horticulture, food science, forest production, restaurant management, and wood technology and utilization are indicated by their names. The student should refer to the University of Illinois Undergraduate Courses Bulletin for course descriptions.

All students should secure and keep for reference the booklet "Regulations Applying to Undergraduate Students." This booklet contains many items of information useful to all students in the University. Also see probation and drop rules, pages 16-17 of this "Handbook."

Requirements for Graduation

Students who have satisfied the general University requirements for graduation, have maintained throughout their course a satisfactory record of scholarship and moral character, and have completed a curriculum in the College of Agriculture, including the prescribed studies and sufficient electives, are graduated with the degree of Bachelor of Science.

The total credit hour requirements for the various degrees are: in floriculture and ornamental horticulture, 130 hours; in food science, 130 hours; in forestry, 136 hours; and in all other agriculture curricula, 126 hours. No credit in physical education courses may be counted in arriving at these totals. (See credit limitations below.) Credits earned in military science may be counted toward graduation in all curricula.

A candidate for graduation must complete all special examinations to remove failures, all proficiency examinations, all excused grades, and all course substitutions by the beginning of the tenth week of his final semester.

Students who have transferred from other educational institutions to the University of Illinois and who are candidates for the degree of Bachelor of Science in an agricultural curriculum are required to complete in residence at least half the technical agriculture credit required for the degree. Transfer students must also complete their senior year, of not less than thirty semester hours, in residence at the University of Illinois.

Each candidate for graduation must have an average of not less than 3.0 including grades in courses transferred from other institutions, and an average of not less than 3.0 in all courses taken at the University of Illinois.

Credit Restrictions. Any student entering the College of Agriculture for the first time after September 1, 1958, may not count work taken in physical education toward any degree in the College of Agriculture. Grades in physical education are not included in the student's average. This restriction does not apply to courses listed under the department headings of dance, health and safety education, and recreation.

No more than 15 credit hours in approved Institute of Aviation courses may be counted toward a degree in agriculture.

No typing or shorthand courses, not more than two hours of credit in music ensemble courses, and not more than ten hours of credit in religion may be counted toward graduation.

No credit toward graduation will be given for Math. 101 and/or 102.

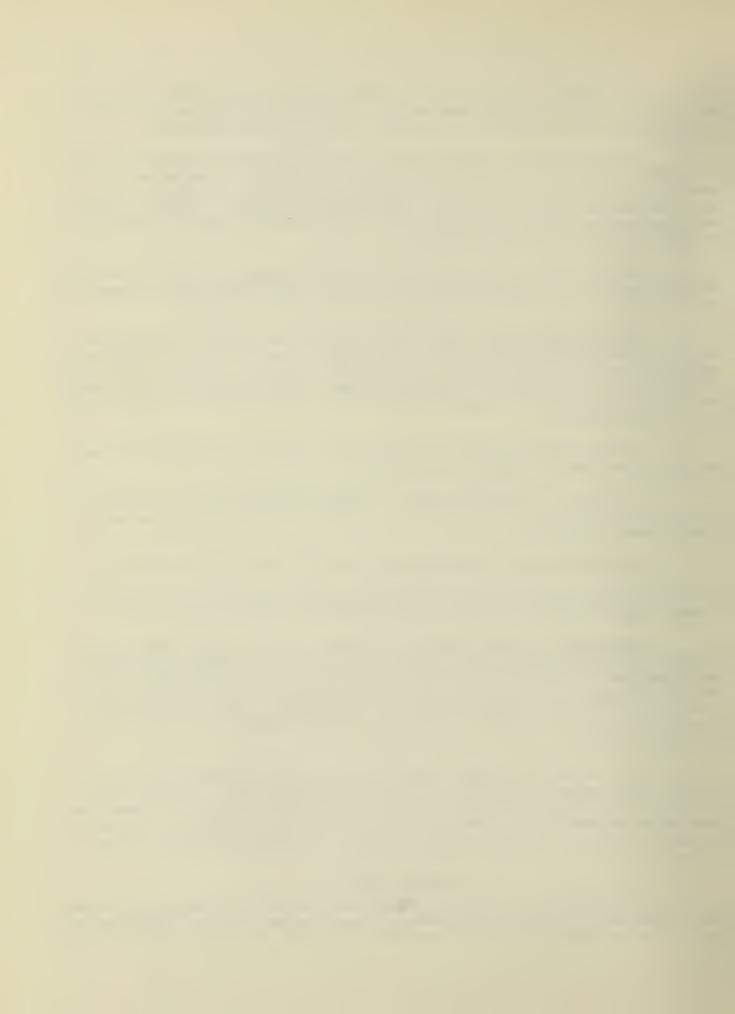

Not more than ten hours of credit in special problems courses may be counted toward graduation in agriculture and home economics curricula.

Computation of Grade-Average. All students must attain a grade-point average of not less than 3.0 ("C") to qualify for the B.S. degree. All resident and transferred work (except physical education) is included in the computation of grade averages. This includes grades of "E" (failure), "ab" (absent), and "dr" (dropped). All grades including "E", "ab", or "dr" always remain in the over-all average, even though the student repeats the course. Grades of "ab" and "dr" are equivalent to "E".

If a course is repeated, both the original and subsequent grades are included in the average. (Example: If a student has completed a course with a grade of "D" and obtains the Associate Dean's permission to repeat the course, and upon second registration receives a grade of "C", both grades will be used in computing the over-all average. Credit is, however, given only once for the same course.)

Honors Program

Encouragement of superior students has always been an aim of the College. The College participates in the University Honors Program, and has established five special honors seminar courses for outstanding students. The College Honors Council

invites selected freshmen and sophomores to participate. Upper classmen who have maintained a 4.0 ("B") average are automatically eligible for participation. These same students are also eligible for honors courses and honors sections offered by other colleges of the University and for certain other activities and privileges offered to James Scholars.

Registration in Special Problems Courses. Courses offered by the various departments under the heading or classification of Special Problems may serve one or more of the following purposes:

- 1. An opportunity for students to test their abilities for research and individual study.
- 2. A means of studying a subject-matter area or problem not covered by a formal course offering.
- 3. A means of making a contribution to the departmental research program in a limited manner.

The following minimum prerequisite has been adopted by the departments concerned for registration in Agricultural Economics 200, Agronomy 300, Agricultural Engineering 300, Animal Science 200, Dairy Science 300, Dairy Technology 200, Horticulture 200, and Plant Pathology 300:

"Minimum grade point average, 3.5; not open to students on probation; consent of the instructor and head of the department."

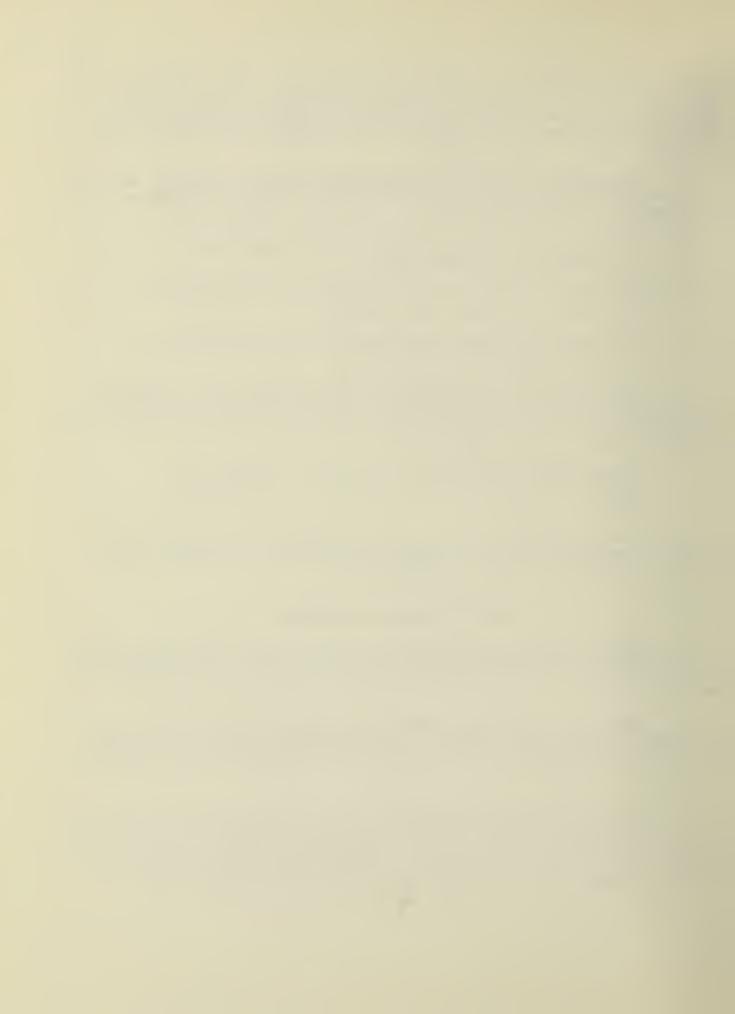

A special registration form must be secured from the Associate Dean's Office for each registration in a special problem course. Exceptions to the stated prerequisite may be made in unusual cases.

General University Requirements

Certain courses, such as rhetoric and physical education, are required for all students. Unless specifically exempted, each student is expected to register for these courses each semester until he has completed the requirements in each.

Rhetoric. Satisfactory proficiency in the use of written English is a requirement for graduation. Students who receive grades of "C" or "D" in Rhetoric 102 (or its equivalent) are required to pass an English qualifying examination before graduating.

Military and Physical Education. Students entering the University with less than sixty semester hours of credit are required to secure four semesters of credit in physical education. Those who enter the University with sixty or more semester hours of credit are exempt from the requirement in physical education. Military science is optional for all students effective September, 1964.

GENERAL EDUCATION SEQUENCES

All College of Agriculture students who enter the University after June 1, 1964, are required to complete sequences of courses in the areas of natural sciences, humanities, and social sciences.

Agriculture students satisfy the natural sciences requirement by completing a curriculum of the College.

HUMANTTTES

All students must complete one six hour sequence from the approved courses within a departmental sequence or from an interdepartmental sequence. Some curricula prescribe certain courses which, if on the approved sequences list, may be used toward completion of this sequence requirement.

Departmental Sequences - Humanities

Architecture - Six hours from the following courses: 113, 214, 215, 216.

<u>Art</u> - Six hours from the following courses: 111, 112, 115, 116, 211, 308, 309, 310, 311, 313, 314, 315, 318, 319, 320, 321, 322, 323, 324.

Classics - 301 and 302.

Division of General Studies - 161 and 162.

English and American Literature - Six hours from any courses except 387.

History - 323 and 324.

<u>Humanities</u> - 151 and 152, 211 and 212, 215 and 216, 363 and 364.

Literature in Foreign Languages - Six hours from 103, 104, (or equivalents), or any 200- or 300-level literature courses in foreign languages.

Music - Six hours from the following courses: 110, 113, 115, 130, 131, 213, 214, 315, 316, 317.

Philosophy - Six hours from the following courses: 101, 102, 105, 110, any 300-level courses.

Speech and Theatre - Six hours from the following courses: 361, 362, 366.

Interdepartmental Sequences - Humanities

Architecture 113 and Art 115 and 116.

Architecture 113 plus 2 courses from Classics 111, 112, 361, 362.

Art 111, 112, or 115 plus Philosophy 323.

Any 3 courses from Art 115, 116, Music 110, 113, and 115.

Classics 111 and Philosophy 303.

English 102, 281, 282, or 316, plus Speech 366.

SOCIAL SCIENCES

- 1. Each student must complete one six hour sequence from the following approved courses within a departmental sequence or from an interdepartmental sequence.
- 2. A minimum of nine hours of social sciences are required in all curricula of the college and some curricula require more than nine hours of social sciences.
- 3. Unless otherwise prescribed, the additional hours of social sciences beyond the sequences may be selected from any course or courses listed under the departmental sequences, interdepartmental sequences, or supplemental list, with the further provision that at least one course must be selected from a department other than the one from which the sequence was selected.
- 4. Some curricula prescribe certain courses which, if on the approved sequence list, may be used toward completion of this sequence requirement.

Departmental Sequences - Social Sciences

Anthropology - Six hours from the following courses: 102, 103, 151, 160, 252, 270, 271, 320, 360, 361, 362, 363, 366, 367, 368, 381, 382.

Division of General Studies - 121 and 122, 151 and 152.

Economics - Six hours from the following courses: 102 or 108, 103, 109, 200, 214, 218, 228, 238, 240, 255, 288, 300, 301, 306, 312, 313.

Geography - Six hours from the following courses: 101, 104, 105, 381, 382.

History - Six hours from the following courses: 111, 112, 131, 132, 151, 152, 181, 182, 211, 212, 260, 261, 262.

Political Science - Six hours from the following courses: 150, 151, 184, 191, 192, 263, 305, 310, 312, 317, 321, 326, 328, 345, 346, 351, 355, 357.

Psychology - Six hours from the following courses: 100 or 103, 101, 150 or 250, 255.

Sociology - Six hours from the following courses: 100, 104, 105, 131, 212, 218, 221, 223, 225, 228, 229, 275, 276, 277, 370.

Interdepartmental Sequences - Social Sciences

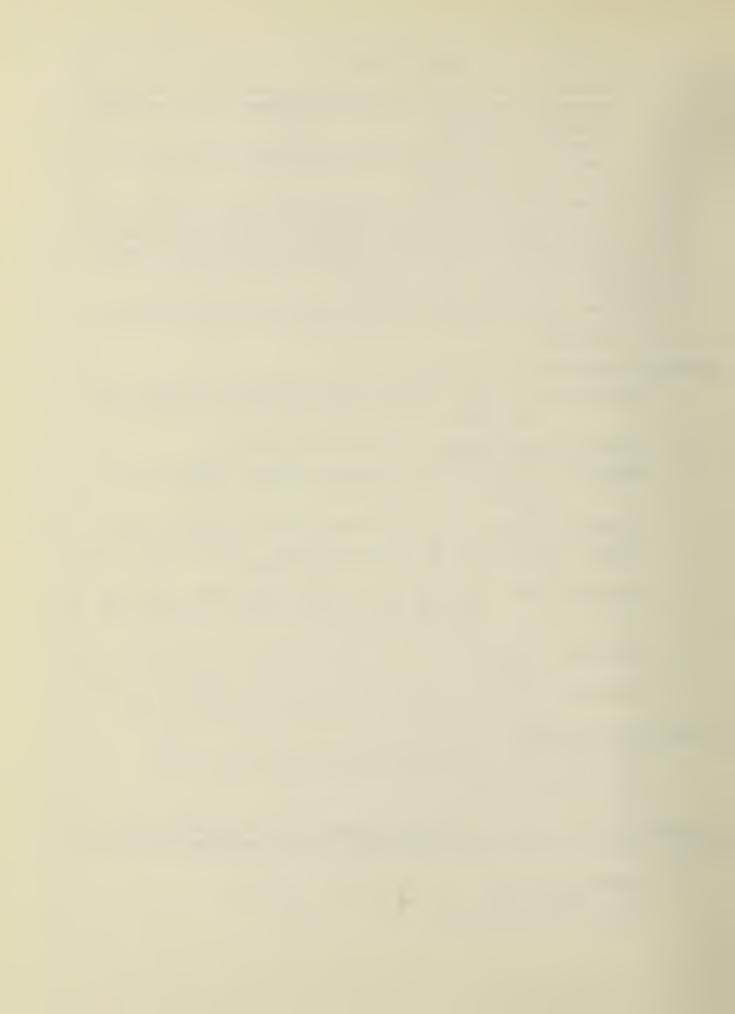

Econ. 108 and Pol. Sci. 150 and History 151, 152, 261, or 262.

Econ. 108 and Psych. 100 or 103 and Soc. 100.

Econ. 108 and Geog. 105.

Supplemental list of courses in the social sciences (may not be used as part of the six-hour sequence, but may be used toward social science requirement beyond the sequence.

Geography 214, 386. Philosophy 103, 104. Social Sciences 201, 301.

Mathematics Requirement

The standard mathematics requirement for admission to the College of Agriculture is one year of high school algebra and one year of high school geometry. Because of the increasing importance of mathematics in everyday life and in most professions, including agriculture, the faculty of the College recommends that students include as much additional mathematics in their high school programs as possible.

A minimum of one course in college algebra is required for graduation in all agriculture curricula, unless the student is exempted by the mathematics placement examination.

Students in certain curricula are required to complete additional mathematics. Others are encouraged to take more than the minimum requirement in accordance with their objectives.

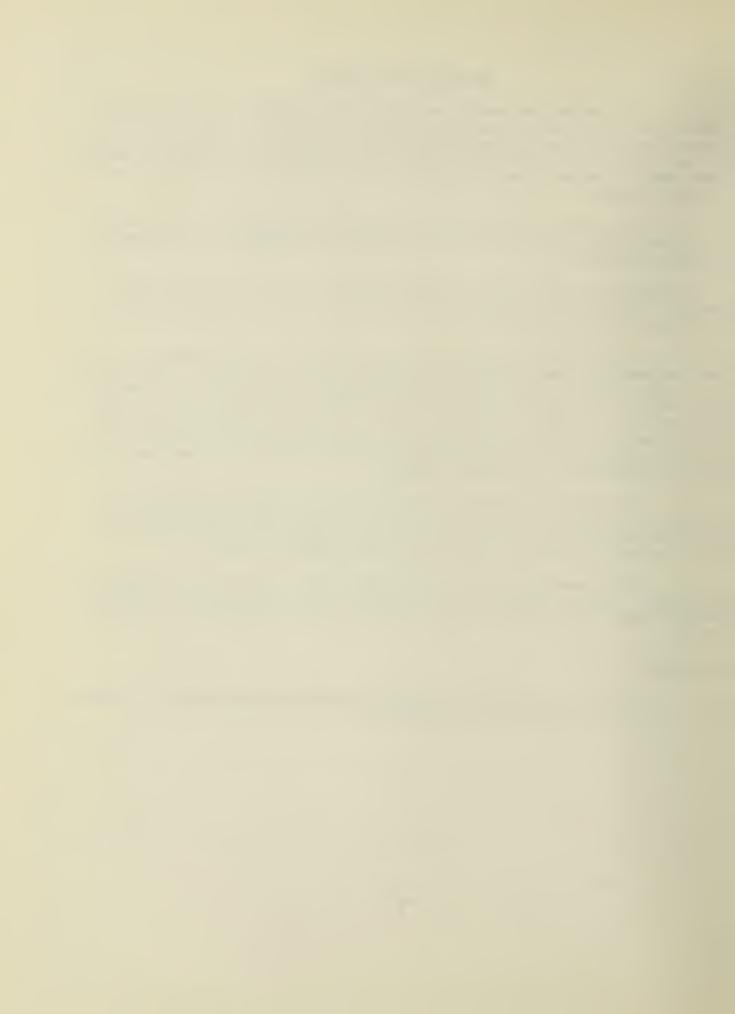

To insure that entering students will be placed in the appropriate college mathematics course, a mathematics placement test is required. This test is to be taken by all students entering the College of Agriculture unless exempted (see below). It is <u>not</u> a proficiency examination. No credit toward graduation will be given to students who pass it. Those who make a sufficiently high grade will be exempt from the algebra requirement and, if they wish or if their curriculum requires it, they may begin college mathematics with a more advanced course, such as trigonometry or analytical geometry.

The mathematics placement test is given at regularly scheduled times during the late spring and early summer and during the registration periods in September and February. Entering students are notified of the time and place when they apply for admission and receive their permits to enter.

The mathematics placement test should not be confused with entrance examinations. Entrance examinations are offered several times each year and are taken by applicants who need to remove deficiencies in specific subjects for admission.

Exceptions

Students who enter with acceptable equivalent college credit in algebra are exempt from the mathematics placement test.

RULES FOR REMEDIAL ACTION

Probation and Drop Regulations as approved by the College of Agriculture Faculty, October 19, 1962

All colleges find it necessary to establish standards of successful performance. The faculty of the College of Agriculture has established the following rules for remedial action for cases in which the level of performance is not commensurate with the expenditure of time and money by the student and the provision of facilities and faculty by the University.

PROBATION RULES

The following Probation Rules apply, provided the student is not subject to Drop Rules (see below).

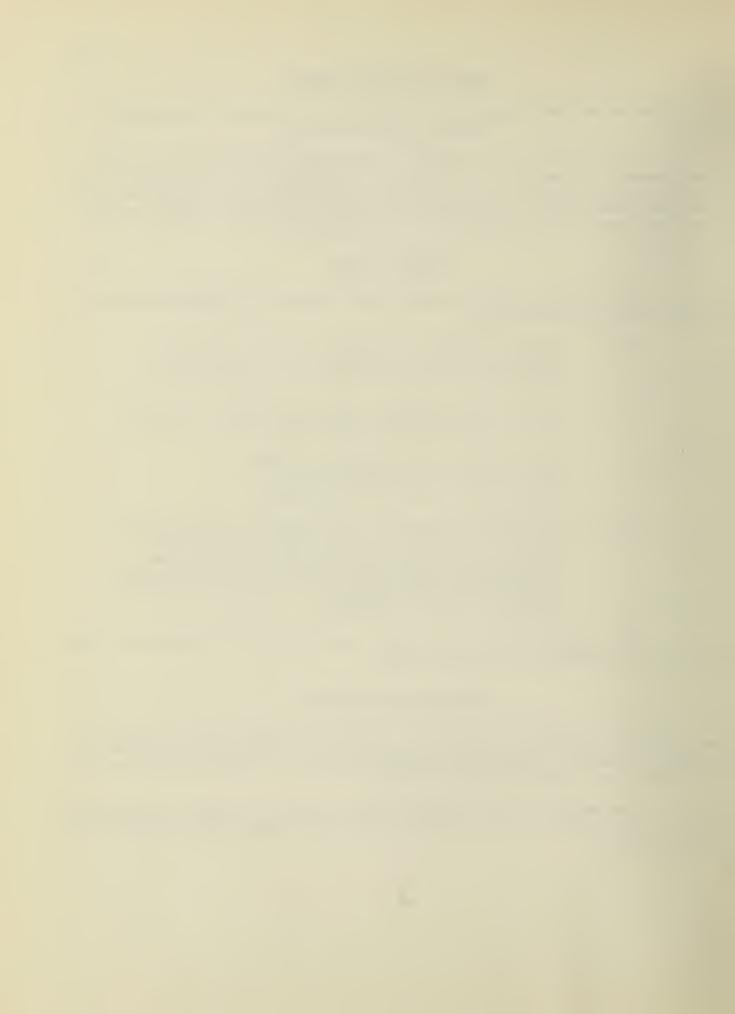

- Rule 1 Failure to attain an average of 3.0 ("C") in the last semester or term of attendance at the University of Illinois.
- Rule 2 Failure to have earned a cumulative College or University of Illinois average of at least:
 - (a) 2.8 for less than 30 hours attempted
 - (b) 2.9 for 30 to 59 hours attempted
 - (c) 3.0 for 60 or more hours attempted
- Rule 3 Continuance on probation. Any student who is not subject to Drop Rules, but whose cumulative College or University of Illinois average is less than 3.0, may be continued on probation, provided he has met the minimum probation level established for him for his last semester or term of attendance.

The probation level, i.e., grades required in the next semester or term, shall be established by the Associate Dean.

Clearance From Probation

If at the end of a semester on probation a student has met or exceeded all minimum conditions as outlined above, he shall be removed from probation. A student who completes less than six semester hours in the summer session may not clear probation by summer session attendance.

The Associate Dean is authorized by the faculty to waive the application of the above probation rules in unusual cases in which these rules would be unfair to the student.

DROP RULES - Dismissal for Scholastic Deficiency

Any student who fails to make satisfactory academic progress may be dismissed from the College and University in accordance with the following rules:

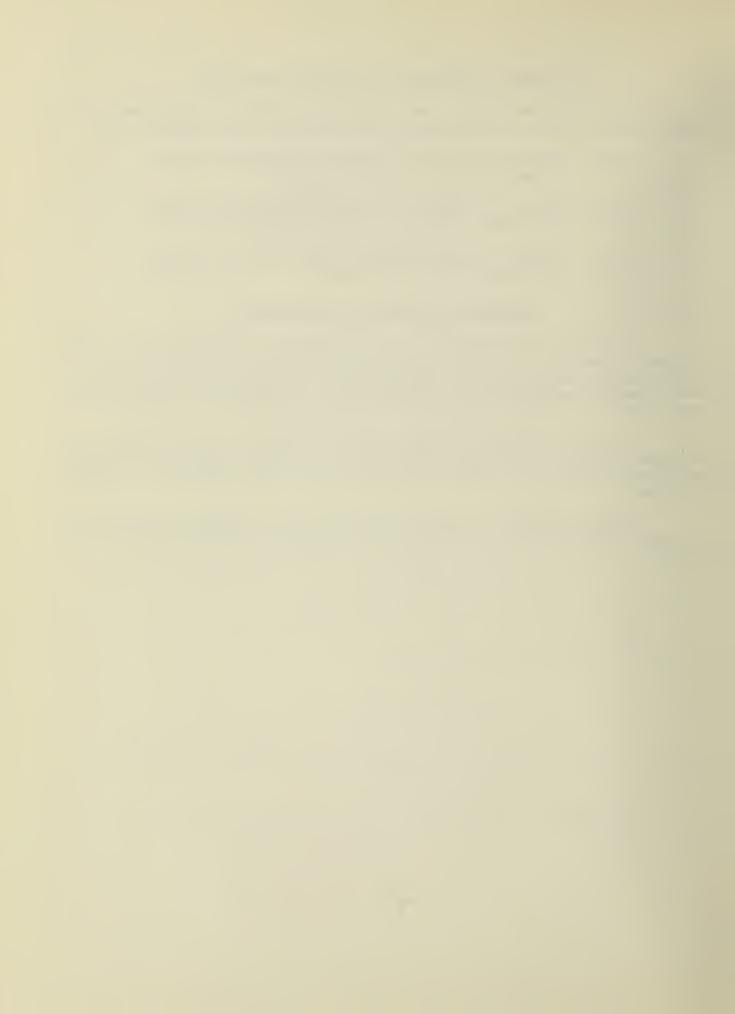

- Rule 1 Failure to attain an average of 2.0 ("D") or better in any semester or summer session.
- Rule 2 Failure to attain an average which clears the probation level established by the Associate Dean.
- Rule 3 Repeated failure to attend classes, or other conduct unbecoming a University student.

Admission or Readmission on Probation

Any student who has been placed on probation or dropped from any other college or university or has been dropped from the College of Agriculture for poor scholarship may be admitted or readmitted only by petition to the Associate Dean. Immediate readmission will be granted only in exceptional cases for which there is good evidence that the cause of low scholarship has been corrected.

If granted admission or readmission, the student shall be on probation, the terms of probation to be fixed by the Associate Dean. Appeals from the Associate Dean's rulings may be made in writing to the College Committee on Scholastic Status.

Students dropped or placed on probation at the University of Illinois do not clear their drop or probation status by attendance at another college of university.

CORE CURRICULUM IN AGRICULTURE

This is a core curriculum in the sense that it provides for a common core program for the first two years. For the junior and senior years, the student may select one of the approved departmental majors or he may continue with a broad general program by selecting the general agriculture major. All students in agriculture pursue a similar general core program for the first two years except those in Agricultural Science, Dairy Technology, Floriculture and Ornamental Horticulture, Food Science, Forestry, Home Economics, Preveterinary Medical, and Restaurant Management.

Freshmen may enter this core curriculum without specifying a major. Transfer students entering this curriculum with 45 or more credit hours should indicate their proposed major on the Application for Admission blank. Each student must make his choice of major not later than the beginning of the junior year and notify the College office of his choice.

The purposes, objectives, and requirements of the various majors and options are outlined on the following pages.

The core program for the first two years includes all general University requirements as well as a broad foundation in basic sciences essential to a fuller understanding of agriculture. In addition, the student has a choice of introductory courses in agriculture. By proper choice of basic courses, in line with the student's ultimate objective and major, the student is ready to proceed with more advanced courses in his junior and senior years. Agriculture 100, required of all freshmen in agriculture, is designed to assist the student in clarifying his objectives.

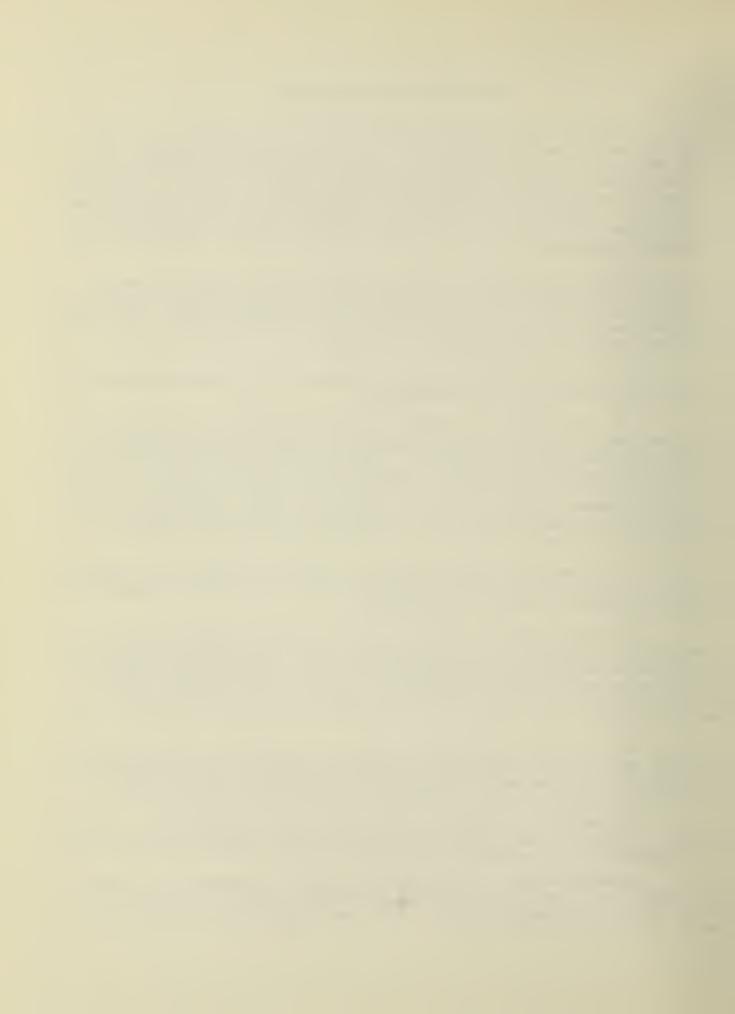

Upon completion of all requirements of this curriculum, with an approved major and a minimum of 126 semester hours of credit, the student is awarded the degree of Bachelor of Science in Agriculture.

Transfers should note that no credit is allowed for Agricultural Economics 100 for students with 60 or more credit hours. Agricultural Economics 220 or 230 may be substituted for Agricultural Economics 100, and may be counted toward the nine hours required in agriculture provided the course taken as a substitute is not needed to fulfill some other agriculture group requirement in the major or option.

Each student is encouraged to study the requirements of the various majors and options and to select the one which best fits his objectives prior to the beginning of his junior year. An appropriate adviser will then be assigned to assist him in planning his program for the junior and senior years.

Recommended or suggested electives are listed with each major. They are listed as a guide. Other courses than those shown may be taken as electives if more appropriate for the student's objective.

A general major is provided for those whose objectives do not properly fall within one of the approved departmental majors. Those who are preparing to teach vocational agriculture in high school must complete the curriculum with a major in vocational agricultural.

11 ----

For the degree of Bachelor of Science in Agriculture

Sample Program for First Two Years

Agriculture Core Courses. In addition to Agriculture 100, one course from three different areas of the four areas listed below must be completed by each student in this curriculum and its related majors.

	Hours
Agricultural Economics:	
Agr. Econ. 100Introductory Agricultural Economics	3
Agricultural Engineering and Technology:	
Agr. Eng. 100Engineering Applications in Agriculture or	
Food Sci. 201Principles of Food and Dairy Product Processing	3
Animal Sciences:	
Animal Science 100Introduction to Animal Science, or	
Dairy Science 100Introduction to Dairy Production	3
Plant Sciences:	
Agronomy 121Principles of Field Crop Science, or	
Forestry 100Farm Forestry, or	
Horticulture 100Introductory Horticulture	4-3

Each student is urged to complete one core course per semester for each of the first three semesters. This will permit the student to select agriculture electives in the fourth and succeeding semesters from those agriculture courses which are specifically prescribed for his major, such as Agronomy 101, Animal Science 110, Dairy Science 120, etc.

Third and Fourth Years

For the third and fourth years, see approved majors. The general requirements in addition to the courses listed for the first two years include completion of:

- 1. All prescribed courses listed for the major.
- 2. At least forty hours of agriculture courses, including prescribed and elective.
- 3. An approved six hour sequence in the humanities and an approved six hour sequence in the social sciences (see pages 13-14).
- 4. Sufficient open electives to bring the total hours to 126, exclusive of physical education.

Humanities and Social Sciences Sequences

See pages 13-14.

- 1/ A noncredit orientation course required of all freshmen in agriculture.
- A student in this curriculum is required to complete either Mathematics 111, Algebra, 5 hours; or Mathematics 112, College Algebra, 3 hours; or Mathematics 104, Elements of Algebra and Trigonometry, 3 hours; or pass the placement examination in mathematics. (Mathematics 104 does not serve as a prerequisite for more advanced courses in mathematics and should not be taken by those who plan to take Mathematics 114, 122, or 123, including those who plan to major in agricultural economics general option or agricultural mechanization major.) A student who passes the placement examination will not be required to take Mathematics 111, 112, or 104, but if he wishes he may take a more advanced course in mathematics. Students who enter the core curriculum with acceptable equivalent college credit in algebra are not required to take the placement examination or additional mathematics. See page 12 for additional details.
- <u>3</u>/ Division of General Studies 111 and 112 may be stubstituted for Rhetoric 101, 102 and Speech 101.
- 4/ One course in organic chemistry is required. For students preparing for graduate training in animal, plant, or soil science, Chemistry 101 or 102 and Chemistry 105 and 133 are recommended. Advisers may recommend this chemistry sequence for other students, where appropriate to their aims and objectives, in place of Chemistry 111 and Chemistry 132. Chemistry 111 and Chemistry 132 are terminal courses and satisfy the minimum chemistry requirements for graduation. Chemistry 105 is a prerequisite for Chemistry 133. Chemistry 132 is not a satisfactory prerequisite for Chemistry 350, 354, and 355, Biochemistry.
- 5/ See pages 13 14 for approved courses.

MAJOR IN AGRICULTURAL ECONOMICS -- FARM MANAGEMENT OPTION

This option is designed particularly for persons interested in farming or in managing agricultural properties for others. It is also appropriate for men interested in agricultural positions with banks, credit agencies, and other agricultural institutions.

For core requirements, see page 19. Other courses required for this option are:

Prescribed Courses in Agriculture Semester	Hours
Agr. Economics 1001/Introd. Agricultural Economics (I, II)	3
An. Sci. or Da. Sci. 120Principles of Animal Nutrition (I,)	II) 3

(5/1/64)

MAJOR IN AGRICULTURAL ECONOMICS -- GENERAL OPTION

This option is designed for students who desire training in agricultural economics without specializing in any particular subject-matter area. It is also appropriate as preparation for analytical and statistical work with agricultural businesses or public agencies.

For core requirements see page 19. Other courses required for this option are:

Prescribed courses in Agriculture Semester	Hours
Agr. Economics 1001/Introd. Agricultural Economics (I,II)	3
Nine hours from the following: Rural Soc. 117Introduction to Rural Sociology (I,II)	2
Agr. Economics 220Farm Management (I,II)	3 3 3 3 3 3 3 3 8
Agr. Economics 230Marketing of Agricultural Products (I,II)	3
Agr. Economics 302Financing Agriculture (II)	3
Agr. Economics 303Agricultural Law (I,II)	3
Agr. Economics 305Agricultural Policies and Programs (I)	3
Agr. Economics 318Land Economics (I)	3
Agr. Economics 341Agricultural Statistics (I)	3 g
Additional Agricultural Economics Elective courses in Agr. to bring total Agr. to a minimum of 40 hours	0
biccoive courses in rigi. To bring total rigi. To a minimum of 40 hours	
Humanities: (see page 13). Must include one of the following:	
Phil. 101Introduction to Philosophy	3
Phil. 102Logic	3
Social Sciences: (see page 14). Must include the following:	
Econ. 200Econ. Analysis for Business or Econ. 300Intermed. Micro-Economic Theory	2
Pol. Sci. 150American Government: Organization and Power	3 3
	5
Non-Agriculture Prescribed: Accy. 201Fundamentals of Accounting (I,II)	2
Math. 1142/Plane Trigonometry (I,II)	3 2
Open Electives to Bring Total Hours to:	126

Suggested Agriculture Electives

Agricultural Economics 312, 324, 325, 342

Agricultural Economics -- one or more commodity marketing courses

Agricultural Engineering 221

Agriculture 114

Agronomy 101, 303

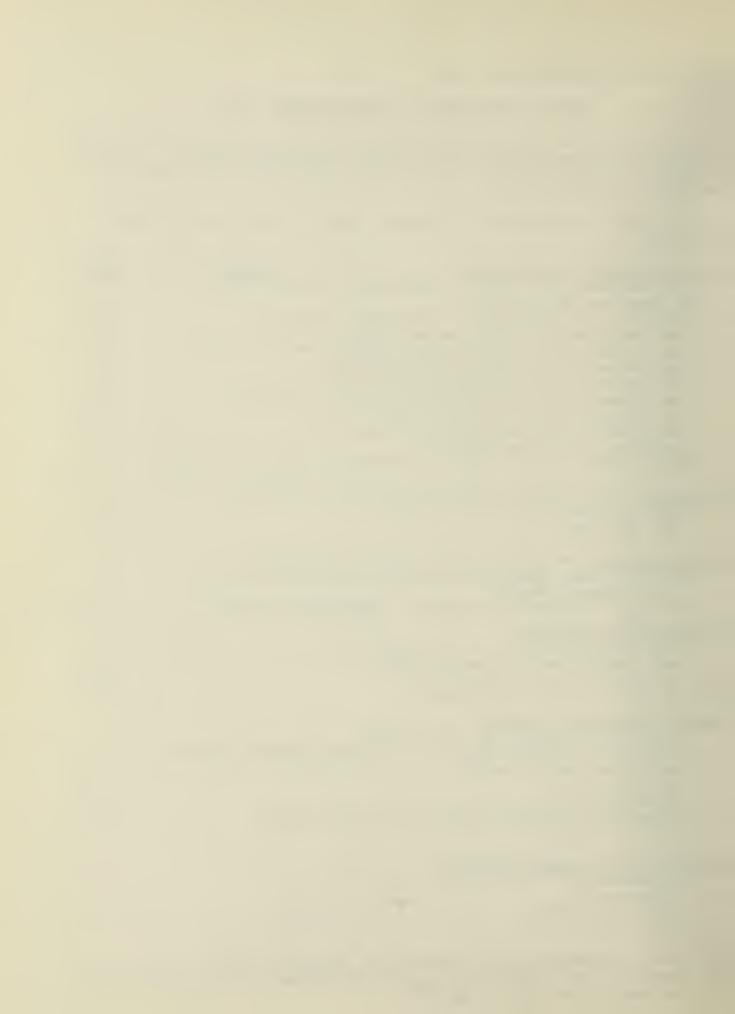

Animal Science or Dairy Science (one or more courses)

Rural Sociology 277

Suggested Non-Agriculture Electives

Economics 214
Psychology 100
Rhetoric 151 or 251
Speech 113

^{1/} Juniors and seniors should substitute Agr. Econ. 220 or 230.
2/ Students in this option who do not pass the Mathematics Placement Test should take Math. 111 or 112, but not 104.

MAJOR IN AGRICULTURAL MECHANIZATION

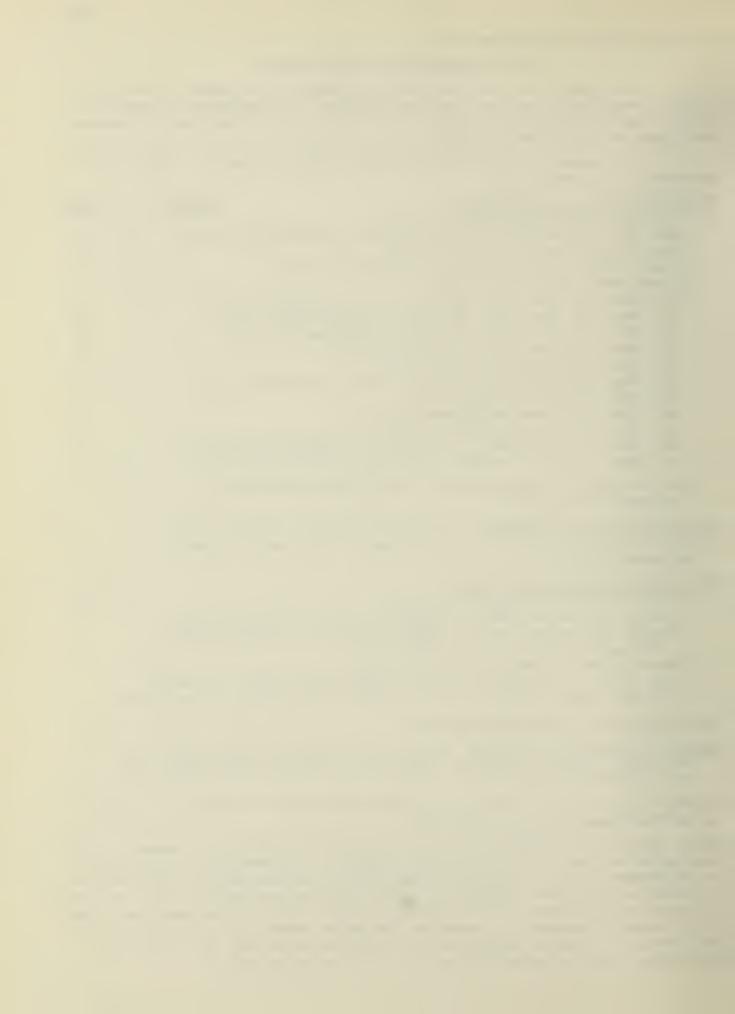

For students who are interested in emphasis in the areas of farm structures, conservation, farm power, and farm machinery in preparation for work with service organizations, retail dealers, power suppliers, contractors, farm management companies, or as farm operators.

For common core requirements of this major, see page 19. Other courses required for this major are:

Prescribed Courses in Agriculture Agr. Econ. 220Farm Management (I,II) Agr. Eng. 100Engineering Applications in Agriculture (I,II) Agron. 101Introductory Soils (I,II) Agron. 121Principles of Field Crop Science (I,II)	Hours 3 3 4 4
Fifteen hours from the following: Agr. Eng. 200Farm Shop: Carpentry and Construction (I,II) Agr. Eng. 201Farm Shop: Electrical and Metal Work (I,II) Agr. Eng. 221Farm Power and Machinery Management (I,II) Agr. Eng. 231Farm Machinery Mechanisms (I) Agr. Eng. 241Farm Tractor Power (II) Agr. Eng. 252Mechanics of Soil and Water Conservation (II) Agr. Eng. 272Farm Buildings (II) Agr. Eng. 281Farmstead Mechanization (I) Agr. Eng. 300Special Problems (I,II) Agr. Eng. 361Development and Function of Family Housing (II) Agr. Eng. 381Electro-Mechanical Agricultural Systems (II)	3 3 3 3 3 3 3 3 3 3
Elective courses in Agriculture to bring total Agriculture to a minimum of forty hours.	
Humanities and Social Sciences: An approved six-hour sequence in the humanities and an approved six-hour sequence in the social sciences. (See pages 13-14.)	12
Prescribed Non-Agriculture Courses Math. 114Plane Trigonometry (I,II) Physics 101General Physics (Mechanics, Heat, and Sound) (I,II) Physics 102General Physics (Light, Electricity, and Magnetism) if organic chemistry is not taken (I,II)	2 5
Eighteen hours from the following: Accy. 201, or 101 and 105; Agr. Econ. 238*; Ind. Admin. 101, 221*, 248, 261, 312*; Marketing 201, 211, 272*; Rhetoric 251, 271, and 272*.	ŕ
Open Electives to Bring Total Hours to:	126
<u>Suggested Agriculture Electives</u> : Ag. Ec. 230, 302,303, 312, 324, 325, 341, 342; Agron. 110, 303, 304, 322, 326; An. Sci. 120, 201, 220; Entom. 101; For. 273, 274; Rur. Soc. 117.	

*Courses approved by department and Courses and Curricula Committee, but not yet given final approval by the University.

NOTE: Agricultural Mechanization majors who anticipate entering a graduate program leading to the Master of Science Degree in Agricultural Economics or Marketing, or the Master's Degree in Business Administration, should plan with their adviser to follow an appropriate sequence of courses beginning preferably in the first term of their sophomore year. The undergraduate program would include additional study in the areas of mathematics, economics, statistics, marketing, and industrial administration. A typical program might be Mathematics 124 and 134 (in place of Mathematics 114), Economics 172 and 200 or 300, and Marketing 201.

126 hours, excluding P.E., are required for the degree as outlined above. Minimum average of 3.0 is required for graduation. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average of 3.0 for transfer and University of Illinois work. (5/1/64)

MAJOR IN AGRONOMY -- OPTIONS IN CROPS OR SOILS

This major is designed for students who wish to specialize in crops and/or soils. For those who may desire later to pursue graduate work, adequate training may be obtained by suitable choices of electives within the framework of this major, or in the agricultural science curriculum.

For common core requirements see page 19. Other courses required in this major are:

Prescribed Courses in Agriculture	Semester	Hours
Agronomy 121Principles of Field Crop Science (I,II) Agronomy 1102/Plant and Animal Genetics (I,II) Agronomy 101Introductory Soils (I,II) Agronomy 2042/Introductory Plant Pathology (II) Agronomy 3031/Soil Fertility (I) Agronomy 3041/Soil Management and Conservation (II)	Demes de l'	3 4 3 3 3
Agronomy 321Crop Ecology (I) Agronomy electives (all Agronomy majors must complete twenty hours of Agronomy in addition to Agronomy 121 and 101)		4 to 10

Elective courses in Agriculture to bring total Agriculture to a minimum of forty hours.

Humanities: An approved sequence (see page 13).	6
Social Sciences: (See page 14). Must include one of the following: History 152History of the U. S. from 1865 to the Present Pol. Sci. 150American Government: Organization & Powers	6 4 3
Open Electives to Bring Total Hours to:	126

Suggested Agriculture Electives

Agronomy courses other than those listed or taken to satisfy the requirements
Agricultural Economics 220, 325, 303
Agricultural Engineering 252
Agronomy 240
Animal Science 201

Suggested Non-Agriculture Electives

Botany 160, 226, 230, 231, 304

Chemistry 105, 122, 354, or 350 and 355

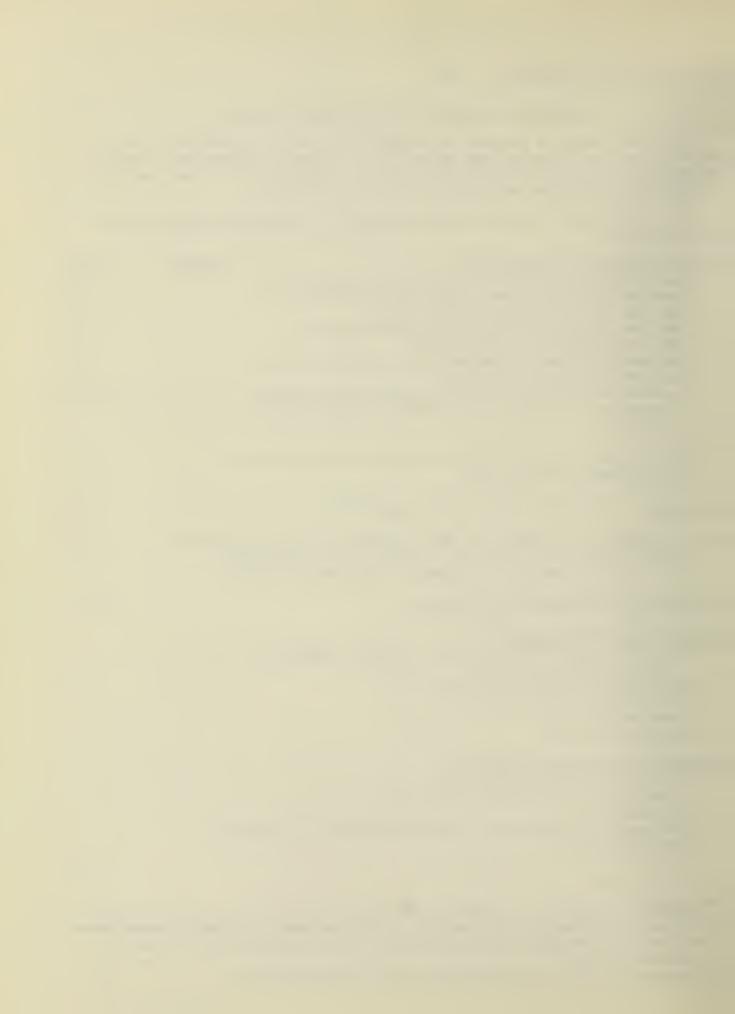

English 304

Mathematics (trigonometry, analytic geometry, and calculus)

Physics 101, 102

^{1/} Students who plan to do graduate work in agronomy-soils should take Agronomy 309 and 310 instead of Agronomy 303 and 304, and they will find it advantageous to plan their programs with their advisers under the agricultural science curriculum.

^{2/} Agronomy 110 and 204 are required in the crops option only.

Core Curriculum in Agriculture, cont.

MAJOR IN DAIRY SCIENCE

The purpose of the major in dairy science is to provide training for students planning careers as dairy farm operators and managers; as fieldmen for milk plants, breed associations, feed companies, and government agencies; as control technicians or salesmen for feed manufacturers; as laboratory and field technicians in artificial insemination; and as breeding consultants.

In addition, this major provides a foundation for advanced study in preparation for careers as college teachers, research scientists in experiment stations and industry, and extension specialists.

For common core requirements of this major, see page 19. Other courses required for this major are:

Prescribed Courses in Agriculture Six hours from Agron. 101, Da. Sci. 110, Da. 126 hours, excluding P.E.		amired	for the degree as outlined above.	Minimum

average of 3.0 is required for graduation. Students who transfer credits myst have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average

of 3.0 for transfer and University of Illinois work.

Core Curriculum in Agriculture, cont.

MAJOR IN HORTICULTURE

For students who are interested primarily in general agriculture but desire a basic knowledge of horticulture. Emphasis is placed on the basic plant sciences to give a general background for the specialized phases of horticulture. By a careful choice of horticulture courses and electives, a student may prepare for the production of fruits, vegetables, or other specialized horticultural crops.

Students who are interested in the production of flowers and other ornamentals, including nursery and turf crops, should enroll in the floriculture and ornamental horticulture curriculum; those expecting to do graduate study should enroll in the agricultural science curriculum with horticulture as the field of special interest.

For common core requirements see page 19. Other courses required in this major are:

Prescribed Courses in Agriculture	Semester	Hours
Horticulture 100Introductory Horticulture (II)		3

Core Curriculum in Agriculture, cont.

MAJOR IN GENERAL AGRICULTURE

For students who are interested in a broad basic training in agriculture rather than in specialization within a departmental field of work. Areas for which such training is suited include farming, agricultural extension, agricultural services, plant protection, pre-theological study, and others.

For common core requirements, see page 19. Other courses required for this major are:

Prescribed Courses in Agriculture	Semester	Hours
Agronomy 101Introductory Soils (I,II)		4
At least three hours credit in each of the fo	ollowing departments, in	
addition to courses taken to complete the cor	re courses in agriculture:	
Agricultural Economics		3
Agricultural Engineering		3
Agronomy (in addition to 101)		3 3 3 3
Animal Science		3
Dairy Science		3
Horticulture		3
Elective courses in Agriculture to bring total	l Agriculture to a minimum	
of <u>fifty</u> hours.		
Humanities and Social Sciences: An approved	six-hour sequence in the	
humanities and an approved six-hour sequence	e in the social sciences.	
(See pages 13-14.)		12
Open Electives to Bring Total Hours to:		126

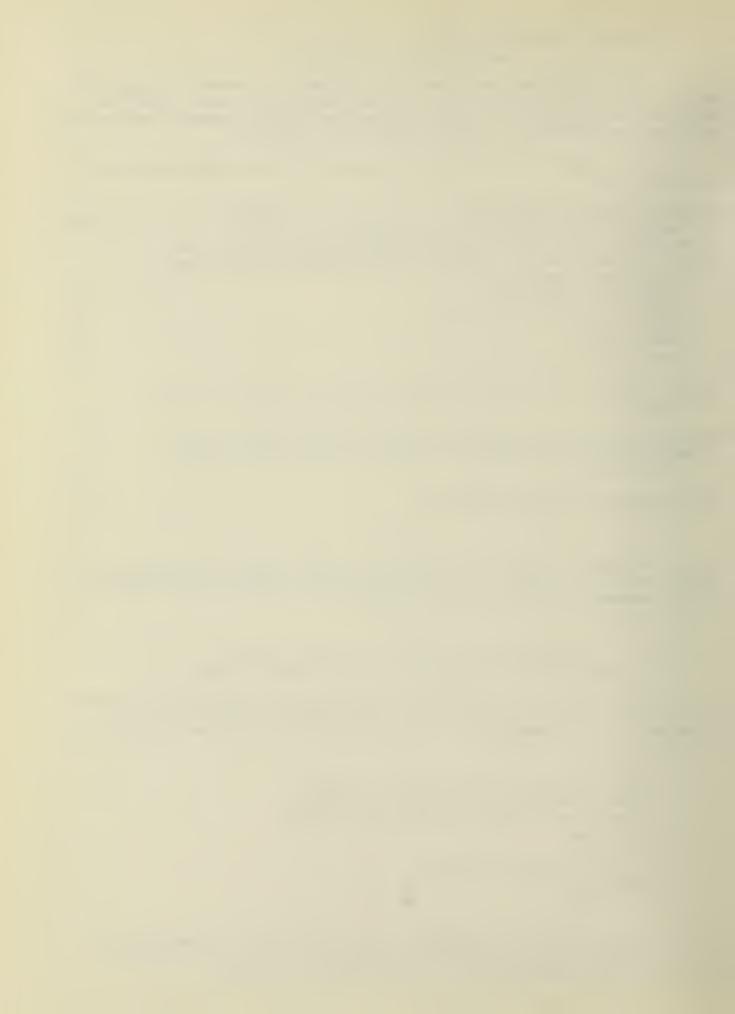

Suggested programs of courses are outlined on the following pages for students who wish to prepare for work in agricultural extension, conservation and wildlife management, or for theological study.

Suggested courses for pre-theological students as preparation for admission to a theological seminary

In addition to the courses specifically required in the first two years of the general curriculum in agriculture, and the general agriculture major, the following are also recommended for students enrolled in the College of Agriculture who plan to enter the ministry:

Education
English Literature (preferably two courses)
Foreign Language (French, German, or Greek)
History or Government (preferably two courses)
Philosophy
Psychology
Religion (Foundation Courses)
Rural Sociology
Sociology

These will fulfill requirements for entry into most seminaries, but a student planning to enter a particular seminary should check as to courses required for admission and pre-enroll in the seminary of his choice.

Suggested Program for Agricultural Extension

(Major in General Agriculture)

Agricultural Courses, including: Agr. Econ. 100Introductory Agr. Economics or Agr. Eng. 100Engineering Applications in Agriculture Agronomy 121Principles of Field Crop Science (I,II) Animal Science 120Principles of Animal Nutrition (I,II) Dairy Science 100Introd. to Dairy Production (I,II) Agronomy 110, An. 126 hours, excluding P.E., are required for the degree as outlined above. Minimum average of 3.0 is required for graduation. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average of 3.0 for transfer and University of Illinois work. (5/1/64)

Curriculum in Agriculture With Major for Teachers of Vocational Agriculture

The purpose of this curriculum is to train young men to teach agriculture in high schools having departments of vocational agriculture. In addition to the training outlined in this curriculum, the present Illinois State Plan for Teachers of Vocational Agriculture calls for a minimum of two years of practical experience on the farm after reaching the age of sixteen.

A minimum of 126 hours of credit, excluding physical education, is required for graduation. While students are advised to take courses in the order indicated, they may with the approval of their advisers take courses at another time.

Since all of the requirements of the common first two years of the Core Curriculum in Agriculture are included in this major, students may follow the core curriculum for the first two years and then change to this major without loss of time.

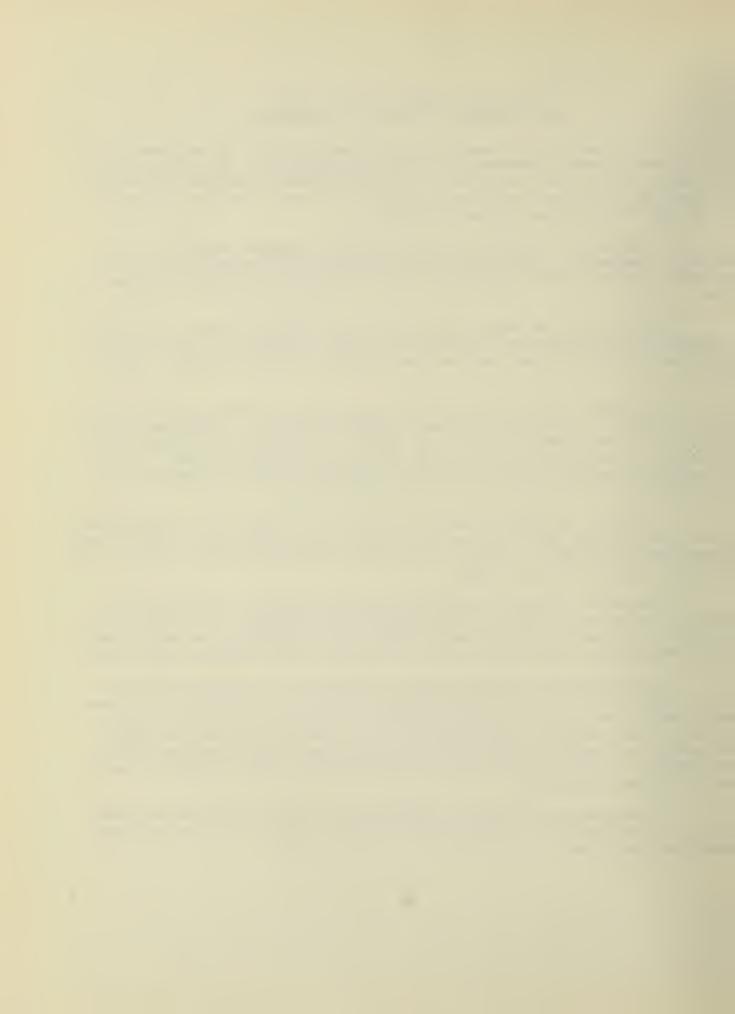

Continuation in this curriculum with a major in vocational agriculture requires admission to advanced standing in teacher education. Application for admission to advanced standing must be made through a vocational agriculture adviser at the time of registration for the final semester of the sophomore year. A student who transfers with more than sophomore standing must apply for admission to advanced standing at the time of his first registration.

Admission to advanced standing is determined on the basis of applicant's academic and personal qualifications for teaching. The completion of certain standardized tests is required. The record of an applicant whose academic average is below 3.5 is subject to special study.

Admission to advanced standing in teacher education is prerequisite to admission to courses in educational practice (student teaching). A student who is admitted to advanced standing in teacher education is admitted to the appropriate educational practice course unless there is subsequent deterioration in his record.

Applications for student teaching assignments are received twice each year. Students who are on the campus during the spring semester prior to the year they expect to enroll in student teaching must apply for an assignment during February of that semester; students who are not on the campus during the spring semester are allowed to apply for assignment during the first three weeks of the fall semester. Application forms may be obtained in the Office of Student Teaching, 121B Education Building.

Vocational Tech. Educ. 275, Summer Experience in Agricultural Education, is highly recommended for students in this major and should be taken between the junior and senior years.

This fifth-year program is open only to students who have previously met the minimum requirement for teaching vocational agriculture under the Smith-Hughes and related acts. It is planned as a fifth year for students who have completed four years of college work fully equivalent to the Curriculum in Agriculture With Major for Teachers of Vocational Agriculture.

Teachers planning to complete the requirements for this degree while employed should note the following regulations:

- 1. Four of the eight required units must be in agriculture and two must be in education, and must be selected with the approval of the adviser.
- 2. Not more than four units may be earned extramurally; of the credits earned extramurally, no more than two can be in agriculture and no more than two can be in education.

^{1/} Students entering as juniors or seniors should substitute Agr. Economics 230 for Agr. Economics 100. If Agr. Econ. 230 is substituted for Agr. Econ. 100, students must also complete a 3-hour elective in Agr. Economics at the 300 level.

Students who wish to qualify for a limited high school certificate as well as a special certificate must complete an approved minor.

126 hours, excluding P.E., are required for the degree as outlined above. A minimum average of 3.0 is required for graduation. An all-University average of 3.5 is required for practice teaching. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average of 3.0 for transfer and U. of I. work.

CURRICULUM IN AGRICULTURAL COMMUNICATIONS

For the Degree of Bachelor of Science in Agriculture

This curriculum is designed for students who wish to pursue careers in the combined fields of agriculture and communications. It seeks to prepare them for work in such careers as agricultural advertising, public relations, farm radio and television broadcasting, photography, and agricultural publications writing or editing. The College of Agriculture and College of Journalism and Communications offer this curriculum as a joint project. It allows the planning of study programs closely suited to the student's interests in one of three communications options: advertising, news-editorial, or radio-television.

Upon completion of the curriculum requirements and a minimum of 126 hours of credit, exclusive of physical education, the student is awarded the degree of Bachelor of Science in Agriculture.

NOTES

- 1/ A non-credit orientation course required of all freshmen in agriculture.
- 2/ A student in this curriculum is required to complete either Math. 111, Algebra, 5 hours; or Math. 112, College Algebra, 3 hours; or Math. 104, Elements of Algebra and Trigonometry, 3 hours; or pass the placement examination in mathematics.
- 3/ D.G.S. 111 and 112, Verbal Communications, both 4-hour courses, may be substituted for Rhetoric 101, and 102 and Speech 101.
- 4/ A minimum of 3 hours required from chemistry, mathematics, geology, or physics.
- 5/ A minimum of 20 hours required, including Econ. 108 and an approved 6-hour sequence (See p. 14).
- 6/ A minimum of 35 hours of agriculture courses required, including 15 hours at the 200-300 level.
- 7/ A minimum of 9 hours required, including an approved 6-hour sequence (see p. 13).
- 8/ A minimum of 20 hours of Journalism and Communications College courses required, including those prescribed for the student's selected option (listed below).

AGRICULTURE CORE COURSES

In addition to Agriculture 100, one course from three of the four areas listed below must be completed by each student in this curriculum.

	Hours
Agricultural Economics:	
Agr. Econ. 100 - Introductory Agricultural Economics	3
Agricultural Engineering and Technology:	
Agr. Eng. 100 - Engineering Applications in Agriculture, or	
Food Sci. 201 - Principles of Food and Dairy Product Processing	3
Animal Sciences:	
An. Sci. 100 - Introduction to Animal Science, or	
Da. Sci. 100 - Introduction to Dairy Production	3
Plant Sciences:	
Agron. 121 - Principles of Field Crop Science, or	
For. 100 - Farm Forestry, or	
Hort. 100 - Introductory Horticulture	3-4

PRESCRIBED COURSES IN COMMUNICATIONS

A student will complete one of the following options:

Advertising Option

Adv. 281 - Introduction to Advertising

Adv. 382 - Advertising Copy and Layout

Adv. 383 - Advertising Media

Adv. 384 - Advertising Campaigns

Electives in Journalism and Communications to complete 20-hour requirement.

News-Editorial Option

Journ. 204 - Typography

Journ. 211 - Newswriting

Journ. 321 - News Editing

One course from the following:

Journ. 217 - History of Communications

Journ. 218 - Communications and Public Opinion

Journ. 220 - Processes and Systems of Communications

Journ. 231 - Mass Communications in a Democratic Society

Journ. 372 - Social Aspects of Mass Communications

One course from the following:

Journ. 212 - Public Affairs Reporting

Journ. 323 - Advanced Reporting

Journ. 326 - Magazine Article Writing

Journ. 330 - Magazine Editing

Journ. 344 - Community Newspaper Publication

Radio-TV 355 - Television News

Electives in Journalism and Communications to complete 20-hour requirement.

Radio-Television Option

Journ. 211 - Newswriting

Radio-TV 252 - Television Laboratory

Radio-TV 261 - Principles of Radio and Television Broadcasting Electives in Journalism and Communications to complete 20-hour requirement, including at least 6 hours of radio-TV courses in addition to 252 and 261.

126 bours, excluding P.E., are required for the degree as outlined above. Minimum of 3.0 is required for graduation. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and a combin ed average of 3.0 for transfer and University of Illinois work. 12/1/65

AGRICULTURAL INDUSTRIES CURRICULUM

(for the degree, Bachelor of Science in Agriculture)

This curriculum provides a broad selection of courses in agricultural sciences, natural sciences, economics and other social sciences, business administration, finance, communication, and the humanities. It is designed to prepare students for careers in those industries and businesses which service or are related to agriculture. A minimum of 26 hours of commerce and business administration courses is required.

During the first two years, this curriculum closely parallels the requirements of the Core Curriculum in Agriculture. Students desiring to transfer to the Agricultural Industries curriculum anytime during the first two years may do so with little difficulty.

Examples of specific opportunities for employment are:

- 1. <u>Farm Supplies</u> Marketing of feed, seed, fertilizer, machinery, equipment, and other supplies to farmers;
- 2. Agricultural Commodities Marketing of agricultural commodities in local, intermediate, and central markets;
- 3. Food and Food Products Distribution of food and food products in wholesale and retail markets, including institutional users; and
- 4. Agricultural Real Estate and Finance Services related to the appraisal, financing, ownership, and transfer of agricultural property.

An adviser will assist each student in planning a specific program.

Upon completion of the curriculum requirements and a minimum of 126 hours of credit, exclusive of physical education, the student is awarded the degree of Bachelor of Science in Agriculture.

Agriculture Core Courses. In addition to Agriculture 100, one course from three different areas of the four areas listed below must be completed by each student in this curriculum and its related majors.

Hours

Agricultural Economics: Agr. Econ. 100Introductory Agricultural Economics	3
Agricultural Engineering and Technology:	
Agr. Eng. 100Engineering Applications in Agriculture or	
Food Science 201Principles of Food and Dairy Product Processing	3
Animal Sciences:	
Animal Science 100Introduction to Animal Science, or	
Dairy Science 100Introduction to Dairy Production	3
Plant Sciences:	
Agronomy 121Principles of Field Crop Science, or	
Forestry 100Farm Forestry, or	
Horticulture 100Introductory Horticulture	4-3

Each student is urged to complete one core course per semester for each of the first three semesters. This will permit the student to select agriculture electives in the fourth and succeeding semesters from those agriculture courses which are suggested for his area of interest.

The general requirements, in addition to the courses listed for the first two years, include completion of:

- 1. A minimum of twenty-six hours of commerce and business courses.
- 2. Twenty-six hours of agriculture electives in addition to the nine hours of agriculture core courses.
- 3. An approved six-hour sequence in the humanities (see page 13).
- 4. A minimum of nine hours of approved social science courses (other than economics). (See page 14.)
- 5. Sufficient open electives to bring the total hours to 126.

Group I - Commerce and business courses prescribed - 26 hours

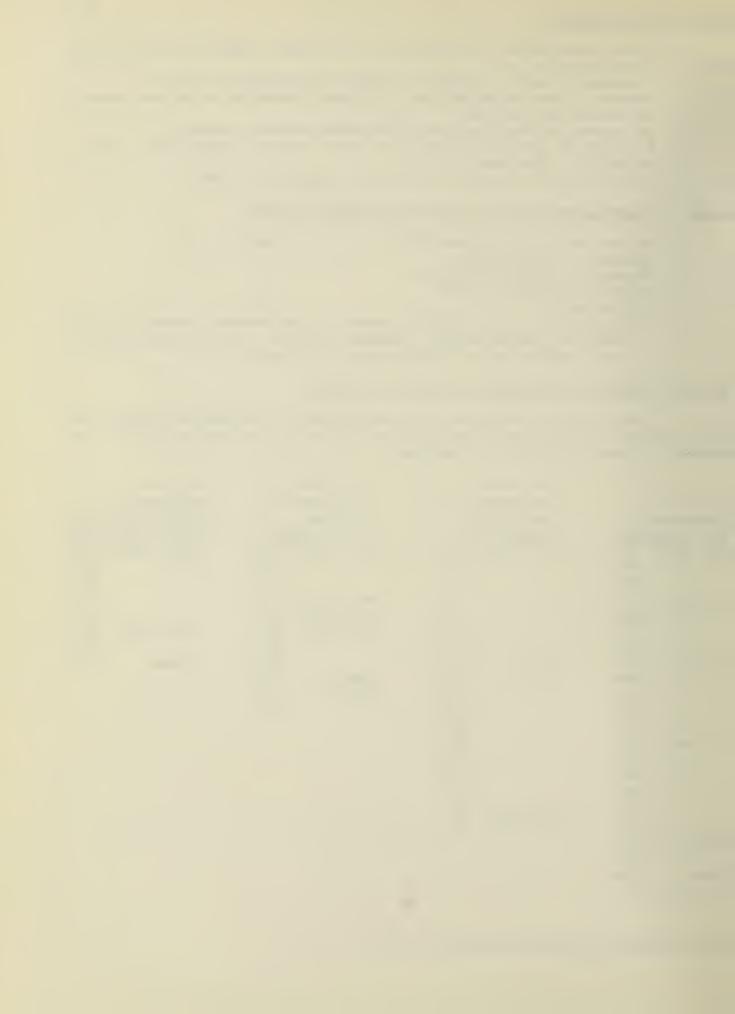

Accountancy 201 or 101 and $105^{7/2}$	3 or 6
Economics 102 and 103 or	
Economics 108 and 200 or 300	6
Finance 150 or 254, or 257 Statistics	3
Statistics	3 or 6

Electives (approved by adviser) chosen from accountancy, Advertising 281, industrial administration, economics, finance, and marketing to bring total commerce and business courses to 26 hours.

Group II - Suggested Agriculture electives - 26 hours

The following listing of agriculture courses is intended as a guide from which electives may be chosen. Other courses may be selected upon approval of the adviser. A total of 26 hours is required.

- 1/ A non-credit orientation course required of all freshmen in agriculture.
- 2/ A student in this curriculum is required to complete either Mathematics 111, Algebra, 5 hours; or Mathematics, 112, College Algebra, 3 hours; or Mathematics 104, Elements of Algebra and Trigonometry, 3 hours; or pass the placement examination in mathematics. See pages 15 and 19 for additional details.
- 3/ D. G. S. 111 and 112, Verbal Communications, both four-hour courses, may be substituted for Rhetoric 101, 102, and Speech 101.
- 4/ See pages 13 14 for approved humanities and social science courses.
- 5/ Economics 102 or 108 is recommended from this group for the sophomore year.
- 6/ One course in journalism, speech, or rhetoric (exclusive of Rhetoric 200) is required, in addition to Rhetoric 101 and 102 and Speech 101.
- 7/ Credit may not be earned for both Accountancy 101 and 201.
- 8/ Economics 171, or 172, and 173, or Agronomy 240, or Agricultural Economics 341, or Mathematics 161. If either Agronomy 240 or Agricultural Economics 341 is used to satisfy this requirement, credit may not also be counted toward Agriculture hours.

126 hours, excluding P.E. are required for the degree as outlined above. Minimum average of 3.0 is required for graduation. Students who transfer credit must have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average of 3.0 for transfer and University of Illinois work.

Agricultural Science Curriculum (for the degree, Bachelor of Science in Agriculture)

This curriculum is especially designed for students who plan to do graduate study in agricultural fields or for those who wish to engage in professional work requiring more science, mathematics, or engineering than is included in the Core Curriculum in Agriculture. Students entering this curriculum as freshmen must have a scholarship rank in the upper half of their graduating class, and those entering as transfers must have a scholastic average in their collegiate work of not less than 3.5 in terms of the grading system of the University of Illinois. Once enrolled, they must maintain an average of at least 3.5 to remain in and graduate from the curriculum.

Options I and II provide an opportunity for planning individual programs of study under the supervision of a faculty adviser qualified in the student's special field of interest. Option III includes many prescribed courses both in agriculture and in engineering. Careful scheduling of courses is necessary.

Option I. For students desiring preparation for graduate study or professional work in animal, plant, or soil science (see footnote 1, page 58), or wildlife management and conservation.

Option II. For students desiring preparation for graduate study or professional work in the fields included in agricultural economics, agricultural law, and rural sociology.

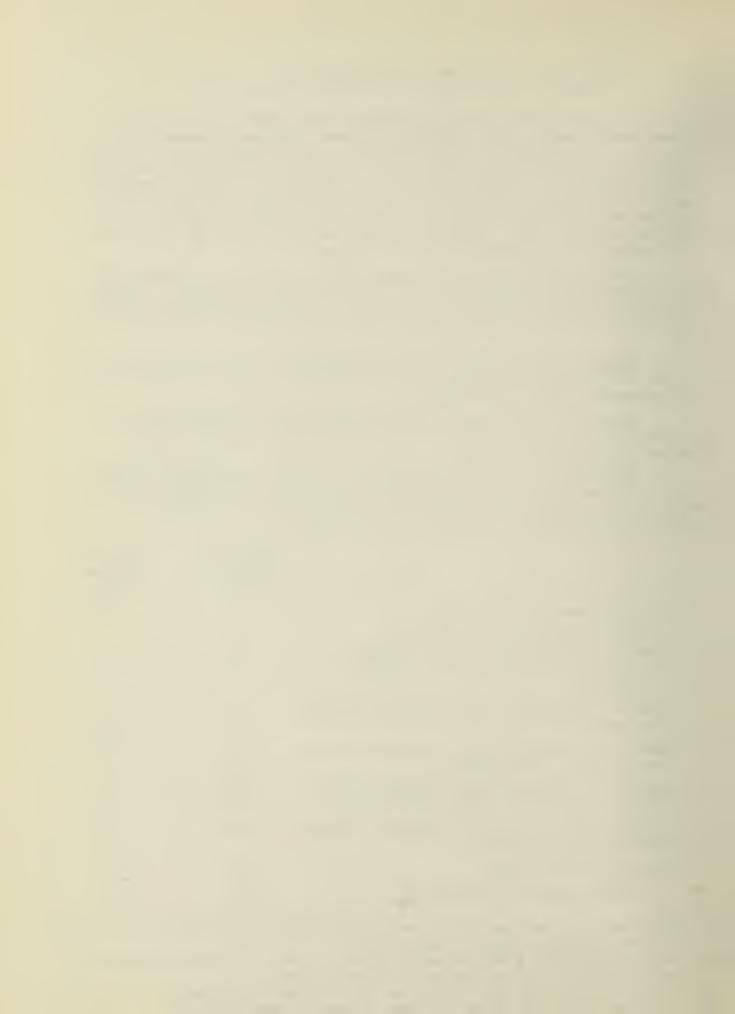

Option III. For students enrolled in the five-year combined agricultural science and agricultural engineering program. All requirements of the combined curriculum as outlined on the following pages must be completed to satisfy the requirements for a degree in agriculture.

isty the requirements for a degree in agriculture.	Options I and III Minimum Hours	Option II Minimum Hours
General University Requirements (Physical Education, and Rhetoric)	6	6
Group I: College of Agriculture Courses (15 of the 30 hours must be at the 200-300 level)	30 <u>1</u> /	30
Group II: Humanities: From approved sequences See page 13.	6	6
Group III: Social Science: Approved sequence and electives. See page 14.	9	163/
Group IV: Biological Science (Botany, Ento-mology, Microbiology, Physiology, Zoology)	102/	6
Group V: Physical Science (Chemistry, Geology, Mathematics, Physics)4/	102/	16
Electives (unrestricted)	30	46
TOTAL required for graduation	126	126

^{1/} In Option III, a maximum of 15 hours of agricultural engineering courses may be credited toward the degree in agriculture.

^{2/} Students in Options I and III must complete a total of 45 hours in Groups IV and V combined, with a minimum of 10 hours in each.

 $[\]frac{3}{4}$ Students in Option II must include at least 8 hours in economics. In Option III, T.A.M. 150 and 211 may be counted toward Group V.

Agricultural Science Curriculum Sample programs for first year

Second, Third, and Fourth Years 3/

The programs for the second, third, and fourth years must be planned in consultation with the student's faculty adviser. 2

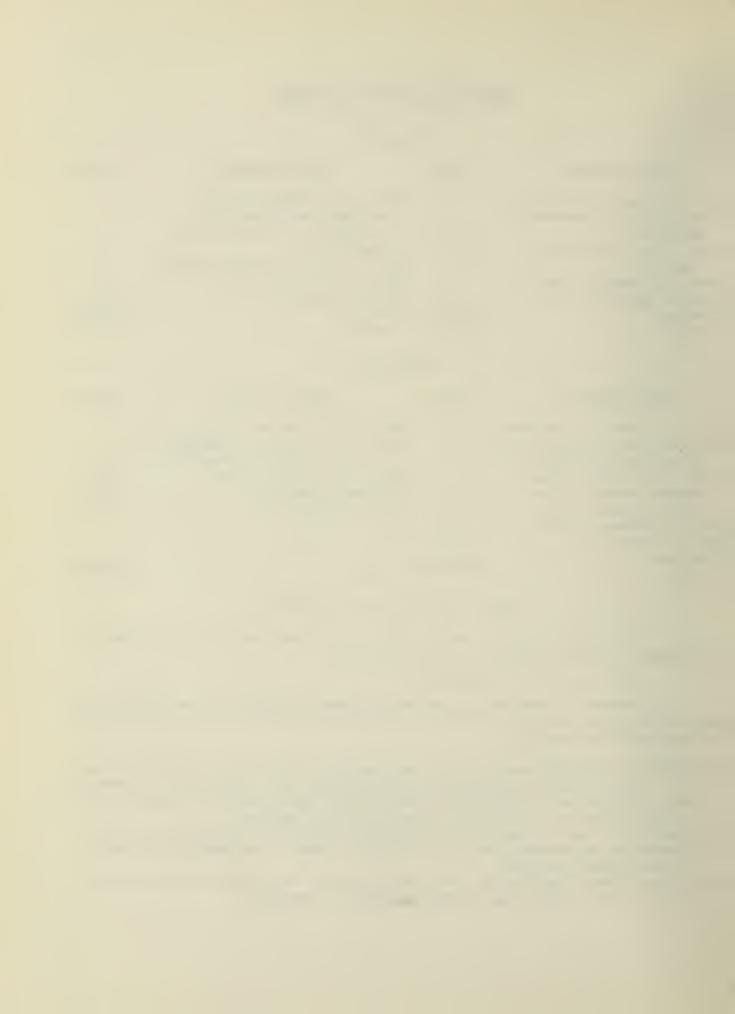

Students interested in combined programs of Agriculture and Agricultural Engineering should see pages 59-60-61. Those interested in combining Agriculture and Law should see page 62.

2/ Students who pass the mathematics placement examination in algebra or in both algebra and trigonometry may omit beginning courses in mathematics and enroll

in more advanced courses.

^{1/} Students who plan graduate work in Agronomy-Soils should take Agronomy 309 and 310. Those having the prerequisites for Agronomy 309, a minimum of 12 hours of soils, and the prescribed rhetoric requirements, are eligible for certification as Soil Scientists by the Soil Science Society of America.

^{3/} No student may enter the Agr. Sci. Curriculum for the first time after the beginning of his senior year in college except by petition.

Agricultural Science Curriculum Option III

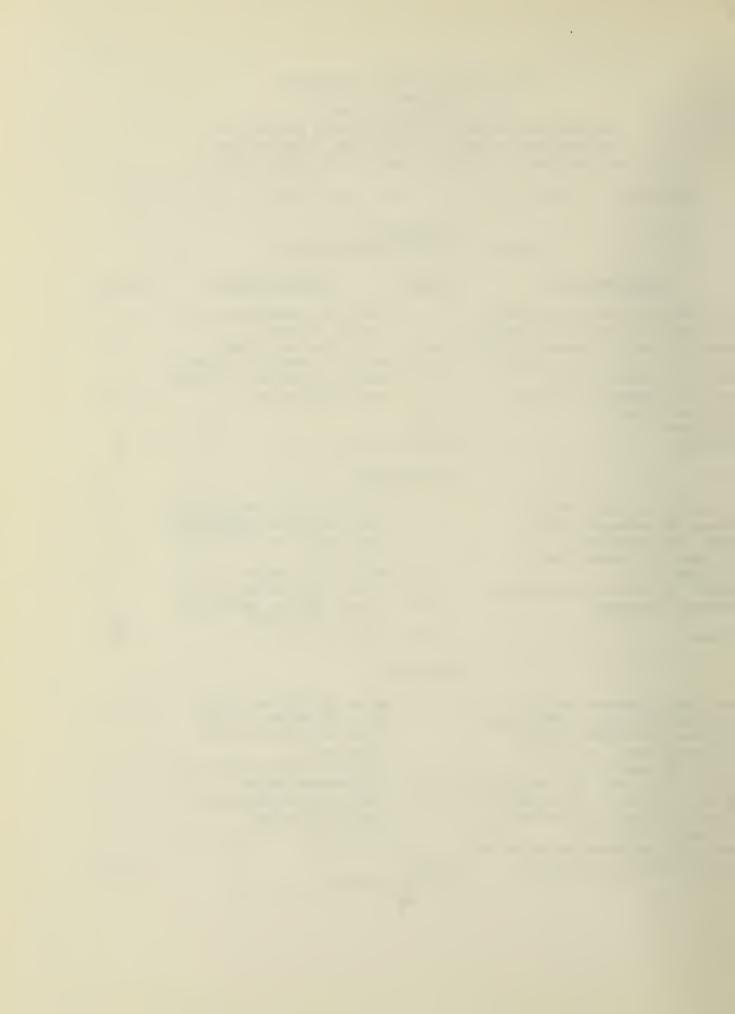

5-Year Combined Program in

Agricultural Science and Agricultural Engineering (for the degrees, Bachelor of Science in Agriculture and Bachelor of Science in Agricultural Engineering)

		C. E. 263
		C. E. 264 3

- 1/ Superior students in the upper 10% of their high school class who have had one year of high school chemistry may take Chem. 109, 5 hours, to complete their chemistry requirements.
- 2/ Students with three or four years of high school mathematics, including trigonometry, and a satisfactory grade on the mathematics placement tests, may take Mathematics 123 the first semester and follow the Common Program for Freshmen in the College of Engineering. This may require three additional hours of physical science to meet graduation requirements.
- 3/ Electives must include the following:
 - 1. 4 hours of agriculture, other than Agricultural Engineering, Agronomy 101 and 121, and Agricultural Economics 220.
 - 2. 6 hours of biological science in addition to Botany 100 (botany, entomology, microbiology, physiology, and zoology).
 - 3. A six hour sequence in humanities courses (see page 13). Since the list of courses which the College of Engineering and College of Agriculture accept for humanities varies, students should be careful to select those which are acceptable to both colleges.
 - 4. A minimum of nine hours of approved social sciences, including Econ. 108, and an approved six hour sequence in social science. Since the list of courses which the College of Engineering and College of Agriculture accept for social science varies, students should be careful to select those which are acceptable to both colleges.
 - 5. Sufficient approved electives (normally three hours) in the humanities in addition to item 3 above to satisfy the College of Engineering requirements (see page 13).
 - 6. Sufficient open electives to total the minimum curriculum requirements of 165 hours exclusive of physical education. All requirements of the combined curriculum as outlined must be completed to satisfy the requirements for a degree in agriculture.

NOTE: Students must maintain a 3.5 grade average to continue in and graduate from the Agricultural Science curriculum. Those whose average falls below this requirement must transfer to the 4-year program in the College of Engineering if they wish to obtain a degree in Agricultural Engineering or to the core curriculum in Agriculture if they wish to obtain a degree in Agriculture.

Agriculture and Law Program

Starting in 1965, the College of Law will require a Bachelor's degree as a prerequisite for admission. The Agriculture and Law program, therefore, will normally require seven years--four years leading to the B. S. degree in Agriculture plus three years in the College of Law leading to the LL.B degree.

The student who is interested in this program may complete the requirements for a degree in any of the approved curricula of the College. For greatest flexibility, Option II of the Agricultural Science curriculum is recommended. See page 57. Students interested in this program should ask to be assigned to an Agriculture pre-Law adviser.

Requirements for admission to the College of Law are as follows:

- 1. A degree from an accredited university or college.
- 2. A 3.5 all-University grade average (based on 5.0 = "A").
- 3. A satisfactory score on the Law School Admission Test.

DATRY TECHNOLOGY CURRICULUM (for the degree of Bachelor of Science in Dairy Technology)

The following program is designed for students interested in the business and technological aspects of dairy manufacturing or in research or teaching in the field of dairy technology. A minimum of 126 hours of credit, excluding P.E., is required for graduation. All students specializing in dairy technology are expected to take an inspection trip in either the junior or the senior year. This trip costs about \$20.

3/ Credit may not be earned for both Accountancy 101 and 201.

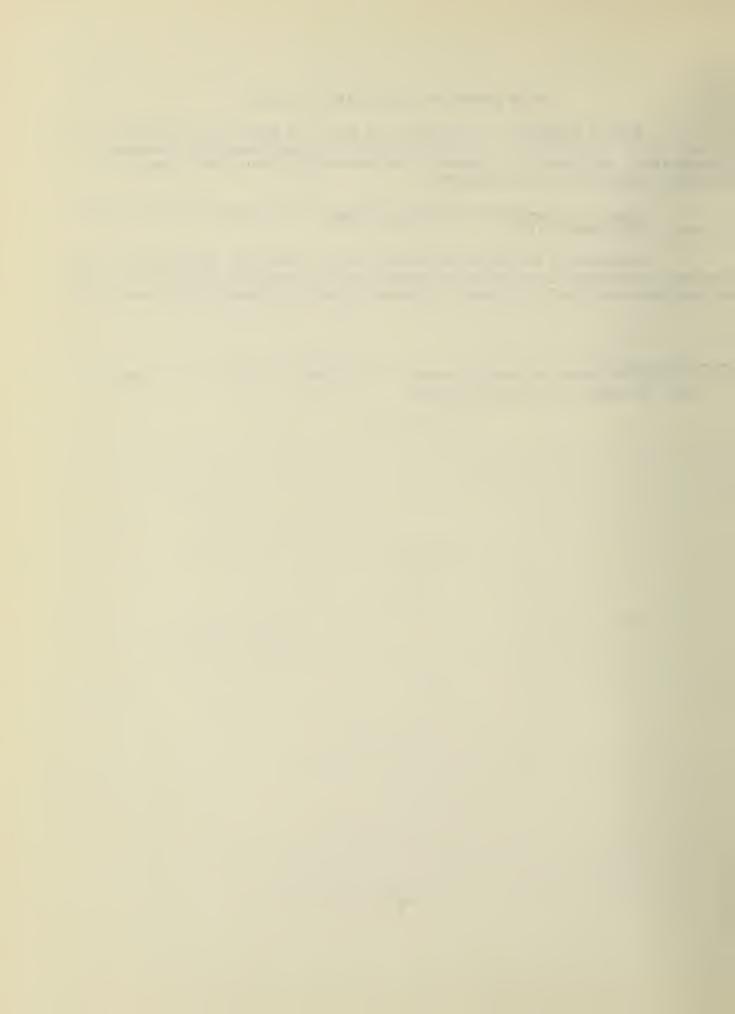

DAIRY TECHNOLOGY CURRICULUM -- Continued

Group I electives: A minimum of 15 hours, at least 6 of which must be in courses above the 100 level, to be selected from science (chemistry, mathematics, microbiology, and physics) or commerce (accountancy, business law, economics / finance, management, and marketing).

Group II - Humanities and Social Sciences: An approved six hour sequence in each. (See pages 13-14.)

Electives in the third and fourth years, chosen with the assistance of an adviser, can provide a background of general business training, a special knowledge of some business field, or a basis for graduate work in preparation for research.

^{1/} Students who select economics courses in fulfillment of Group I or II may not count the same course in both groups.

126 hours, excluding physical education, are required for the degree as outlined above. A minimum average of 3.0 is required for graduation. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average of 3.0 for transfer and U. of I. work.

1/ Students interested in business management should take Accy. 101 and 105. Credit may not be earned for both Accountancy 101 and Accountancy 201.

2/ Students who select economics courses in fulfillment of Group I or Social Science courses may not count the same course in both groups.

CURRICULUM IN FLORICULTURE AND ORNAMENTAL HORTICULTURE
(For the Degree of Bachelor of Science in Floriculture and Ornamental Horticulture)

The curriculum in Floriculture and Ornamental Horticulture is intended primarily for students preparing to produce and/or market flower crops, nursery products, and other ornamentals; engage in related professional activities; or do teaching and research in this field.

More specifically, students may seek training in the respective field of specialization noted below or in other closely related areas:

- 1. Production of flower crops and other ornamentals, both indoors and out.
- 2. Greenhouse management and operation.
- 3. Nursery and turf management and production.
- 4. Flower shop management and floral designing.
- 5. Retail and wholesale marketing of floricultural specialties.
- 6. Floricultural and ornamental horticultural service, including extension work, industrial consulting, journalism, municipal park employment, quarantine service employment, sales, etc.
- 7. Preparation for advanced studies leading to academic positions in teaching, research, and extension; executive, supervisory, or research positions with commercial firms; and various other floricultural and ornamental horticultural service activities.

A minimum of 130 hours of credit is required for graduation, exclusive of physical education (4 hours). Requirements have been kept at a minimum to allow the individual student to progress in the field of his particular interest under the close guidance of his adviser. All students in this curriculum will follow a common first-year program.

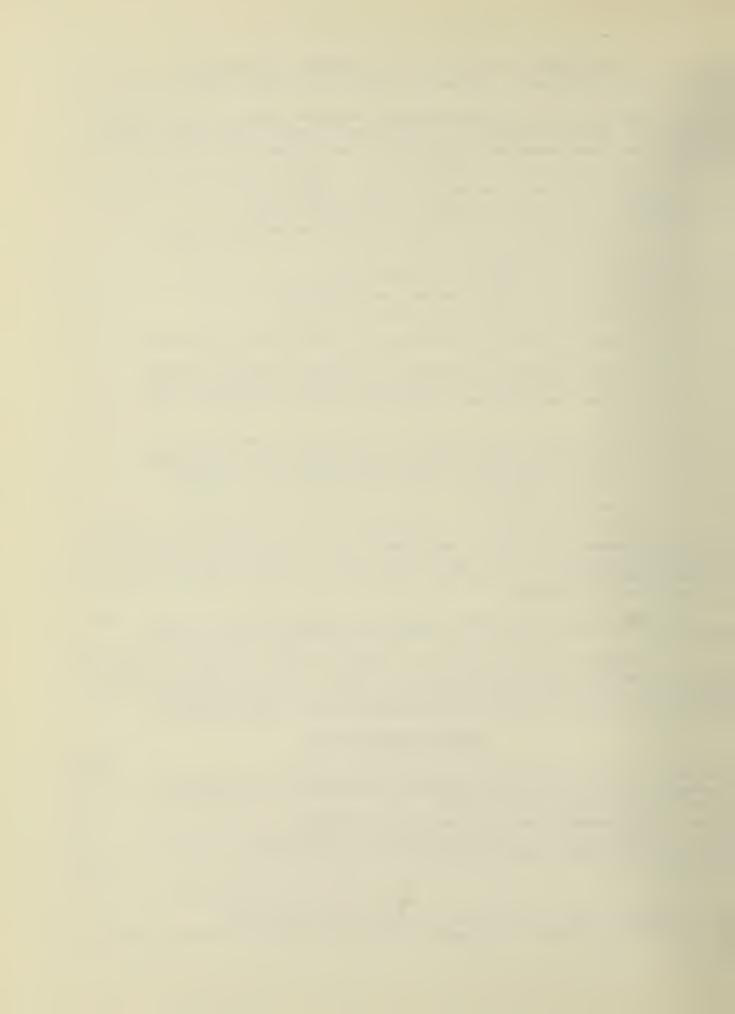

More complete information and sample programs for various areas of specialization may be obtained at 100 Floriculture Building, Urbana, Illinois.

Students in this curriculum are required to make at least one inspection trip to commercial establishments before graduation. The trip costs about \$35.00. Students are also advised and encouraged to acquire practical experience through employment in florist or nursery establishments during vacation periods.

Students in this curriculum are required to complete either Math. 111, Algebra, 5 hours; Math. 112, College Algebra, 3 hours; or pass the placement examination in mathematics. Students who enter this curriculum with acceptable equivalent college credit in algebra are not required to take the placement examination or additional mathematics.

^{4/} Offered in alternate years only.

6

Students contemplating continuation of their studies for an advanced degree are encouraged to elect one of the foreign languages, preferably French or German.

Social Science—an approved sequence and a minimum of nine hours including Economics 108. (See page 14.)

roup III Requirements - Biological and Physical Sciences: A minimum of 16 hours will be selected from this group, including at least one course in chemistry:

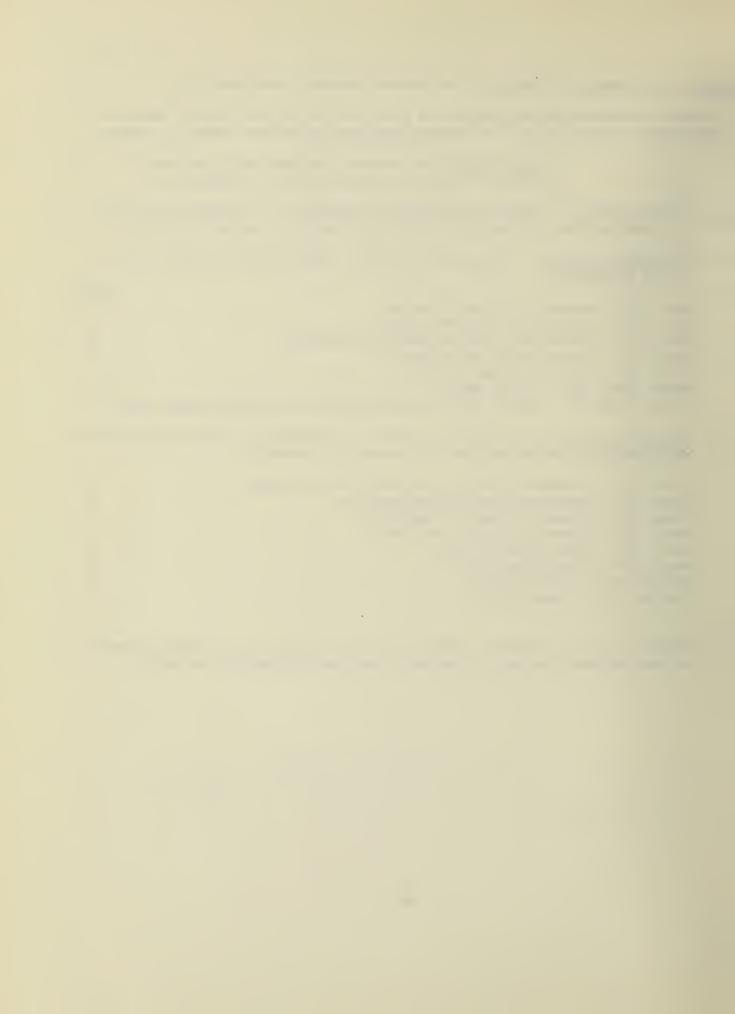

A. Biological Sciences: A minimum of 6 hours, representing at least two different departments.

	Hours
Bot. 160 - Introductory Plant Taxonomy	3
Bot. 230 - Introductory Plant Physiology	3
Bot. 231 - Introductory Plant Physiology Laboratory	2
Entom. 101 - Agricultural Entomology	3
Hort. 110 - Plant and Animal Genetics	3
Mcbio. 100 & 101 - Intro. Mcbio.	5
Plant. Path. 204 - Intro. Plant Pathology or Plant Path. 301, Plant Path.	3-4

B. Physical Sciences: A minimum of 6 hours, representing at least two different departments, including at least one course in chemistry.

Chem. 105 - Inorganic Chemistry and Qualitative Analysis	5
Chem. 122 - Elementary Quantitative Analysis	5
Chem. 132 - Elementary Organic Chemistry 5	3
Chem. 133 - Elementary Organic Chemistry	5
Geol. 105 - Agricultural Geology	4
Math. 114 - Plane Trigonometry	2
Physics 101 - General Physics	5
Physics 102 - General Physics	5

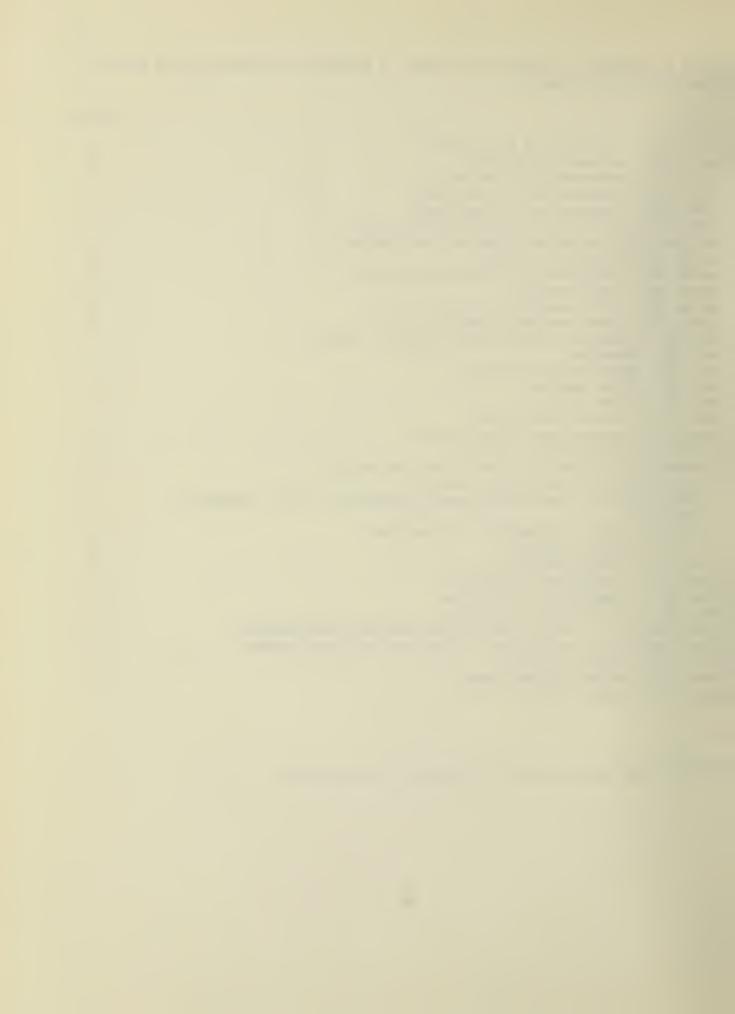

^{5/} Chemistry 132 is a terminal course and will not serve as the organic prerequisite for more advanced courses in chemistry, such as biochemistry and others.

Group IV Requirements - Supporting Courses: A minimum of 20 hours will be selected from this group of courses:

	Hours
Accy. 101 - Principles of Accounting 1	3
Accy. 105 - Accounting Procedure	3
Accy. 108 - Intermediate Accounting	3
Accy. 201 - Fundamentals of Accounting 1/	3

FOOD SCIENCE CURRICULUM (for the degree, Bachelor of Science in Food Science)

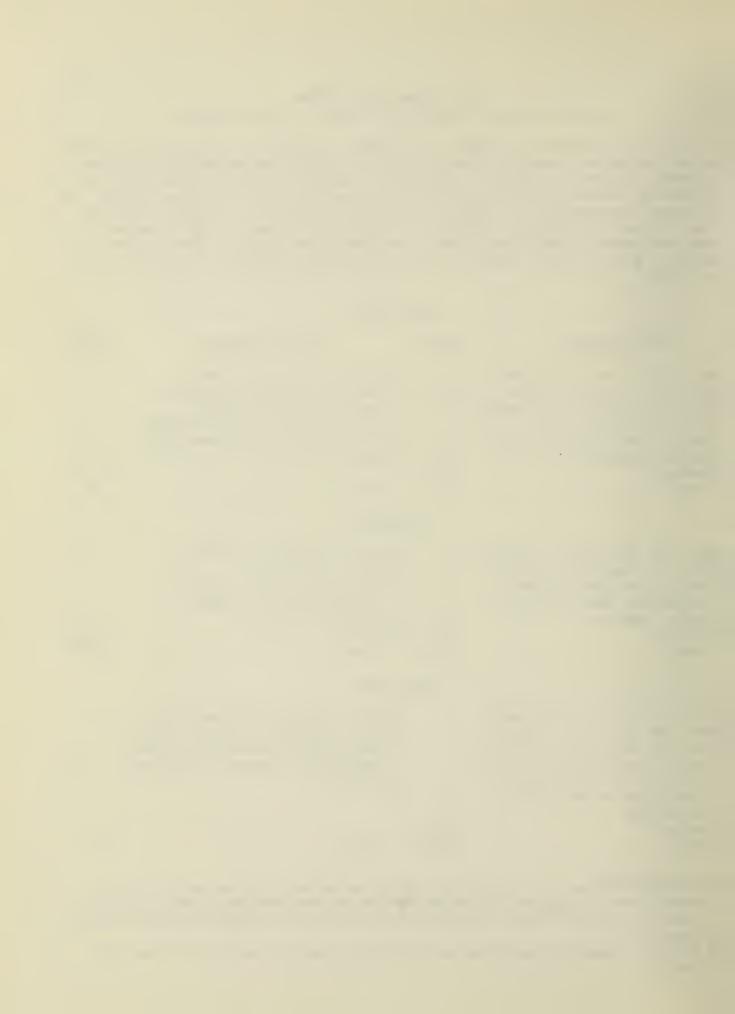

This program is designed for students who wish to prepare for employment as food production, quality control, research, or technical sales workers in governmental agencies, educational institutions, and such food-processing industries as canning, freezing, fermenting, milling and baking, vegetable oil processing, and confection manufacturing. A total of 130 hours of credit is required for graduation, exclusive of physical education. Students are strongly urged to engage in at least one summer of employment in selected food-processing industries and are required to go on a senior inspection trip of three days' duration. This trip costs about \$20.

¹³⁰ hours, exclusive of P.E., are required for the degree. A minimum average of 3.0 is required for graduation. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and a combined average of 3.0 for transfer and U. of I. work. (5/1/64)

FOREST PRODUCTION CURRICULUM (for the degree of B.S. in Forestry)

The curriculum in forest production prepares students for various activities in the establishment, protection, management, and utilization of timber crops and forested lands. Graduates are qualified for employment by public agencies or in private industry. A summer camp of eight weeks is required for all students. This should come between the second and third years. Most of the instruction is given at Camp Rabideau, Blackduck, Minnesota. Estimated cost of \$225 includes tuition, fees, transportation, meals, and lodging.

Zoology 342Wildlife Management and Conservation	3

A minimum of 136 hours of credit, excluding Physical Education and including 8 credit hours earned in Summer Camp, are required for graduation.

2/ The work of this semester will be arranged so that several extended field trips may be taken in the first half of the semester.

Humanities and Social Sciences: must include an approved six hour sequence in each. (See pages 13 and 14.)

^{3/} On a temporary basis, Geography 378, Descriptive Interpretation of Aerial Photography, may be substituted for Forestry 229.

136 hours of credit, excluding P.E. and including eight credit hours earned in summer camp*, are required for graduation. A minimum of 3.0 is required for graduation. Students who transfer credits have a minimum average of 3.0 in all courses taken at the U. of I. and combined average of 3.0 for transfer and U. of I. work. (5/1/64)

CURRICULUM IN WOOD TECHNOLOGY AND UTILIZATION (for the degree of B.S. in Forestry)

The curriculum in wood technology and utilization prepares students to work with wood as a raw material. These specialists will enter positions which deal with the physical and mechanical properties of wood. They will be concerned with using wood in new and better ways, with the seasoning, manufacturing, purchase, sale, preservative or fire-retardant treatment, gluing, or finishing of wood. A minimum of ten weeks of non-credit summer industrial experience must be served with some wood-conversion or wood-using industry. This experience usually comes between the junior and senior years.

	P.EP.E.	(1-1)			

136 hours of credit, excluding P.E., and including eight credit hours earned in summer camp*, are required for graduation. A minimum of 3.0 is required for graduation. Students who transfer credits must have a minimum average of 3.0 in all courses taken at the U. of I. and combined average of 3.0 for transfer and U. of I. work. (5/1/64)

PREVETERINARY MEDICAL PROGRAM

Students applying for admission to the preveterinary program must rank in the upper half of their high school graduating classes. They must maintain at least a 3.5 average to remain in the program; otherwise they are transferred to the core curriculum.

Students transferring with advanced standing must have maintained at least a 3.5 average in terms of the University's grading system.

A minimum of 3.5 average and sixty semester hours, exclusive of physical education and military training, are required for admission to the College of Veterinary Medicine.

	First	Year

Chem. 122Elem. Quant. Analysis or Chem. 133Elem. Org. Chem. Language2/ Physics 101General Physics (Mechanics, Heat, and Sound) Physical Education Elective Total	5 4 5 (1) 0-4 15-19	Chem. 133Elem. Org. Chem. or Chem. 122Elem. Quant. Analysis Language ² / Physics 102General Physics (Light, Elec., and Magnetism) Physical Education Elective Total	5 (1) 0-4 15-19

Electives must include at least seven hours in not less than two of the following fields: economics (including agricultural economics), fine arts, language, geography, history, literature, philosophy, political science, psychology, sociology, speech. (Note that the program outlined above provides eight hours of language credit. Since only six hours of language are required for admission to the College of Veterinary Medicine, the two extra hours can be applied to the nine hours of electives in the listed fields, thus reducing them to seven. Students who take D.G.S. 111 and 112, totaling 8 hours, in place of Rhetoric 101 and 102, may also apply two hours of this credit, as oral communications-speech, toward the required electives.)

Students who take Chemistry 102 and no mathematics, or no foreign language (by virtue of exemption based on high school credits), will need additional hours from the above group of electives, or from free electives, to bring their total hours to sixty.

^{1/} Students who have at least one-half unit in high school trigonometry are not required to take any mathematics. Such students should select a 3- or 4-hour course from the required elective group for their first semester.

^{2/} Three or more years of credit in one language in high school is accepted as fulfilling the language requirement. Exemption from Language 101 (language placement test) and completion of Language 102 also satisfy the foreign language requirement.

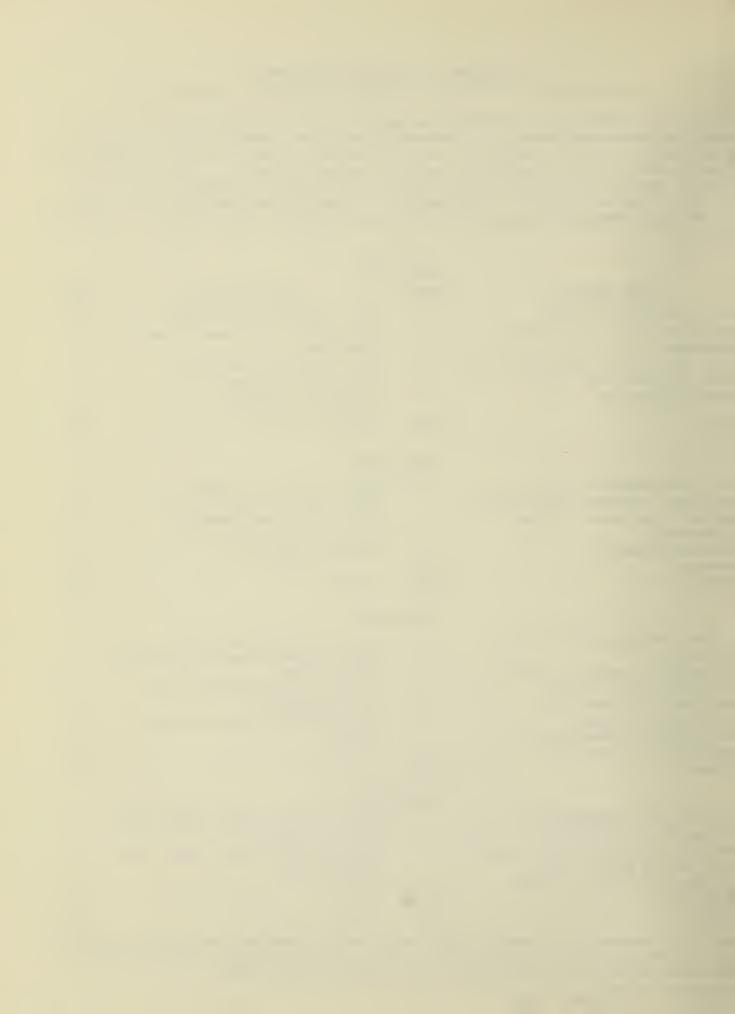

CURRICULUM IN RESTAURANT MANAGEMENT (for the degree of Bachelor of Science in Restaurant Management)

The curriculum in restaurant management prepares students (both men and women) for managerial positions in restaurants and other commercial food service units. It also gives them basic training for work as purchasing agents, kitchen equipment and layout specialists, food inspectors, and other allied occupations. A total of 126 hours of credit, excluding physical education, is required for graduation. Two oneday field trips are required: (1) orientation to metropolitan restaurants, fall; and (2) National Restaurant Association annual meeting, spring. Estimated costs: \$15 each trip.
